

ARKOGRAF electric engraver for metal and pyrography pen for wood, cork, leather, plastic

Mains voltage 230 V AC, 50 Hz

Application:

For engraving all electrically conductive metals as well as wood, cork, leather, plastic

Version:

- Apply the engraving to metals using the writing pen with a special electrode
- In the form of fine lines, the thickness of which can be adjusted.
- Infinite adjustment of the font thickness using a controller
- The supplied pyrography pen is used for engraving on non-metallic materials
- The hot loop starts to glow once the device is switched on, and the motif can be engraved into the workpiece.
- Max. power 40 VA, protective earth

Advantage:

- Non-hazardous voltage from 2 to 8 V thanks to protective transformer
- Low working voltage means low spark and light development

Delivery:

In a sturdy wooden case with writing pen for engraving metal, pyrography pen, ground plate, three writing needles 1.2 x 25 mm, three hot loops, operating instructions

Art. no.	78045 020
Suitable for	Steel, Metal, Nonferrous, Wood, Plastic
Power input	40 W
