About Cd-free contacts
We have introduced cadmium-free type products to reduce environmentally hazardous substances. Please replace parts that contain cadmium with Cd-free products. Evaluate them with your actual application before use because the life of a relay depends on the contact material and load.

Note: Add the suffix “F” to the part number for the 1 Form A 1 Form B contact type. The 1 Form A and 2 Form A contact types were originally Cd-free, hence the suffix “F” is not required.

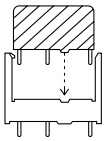
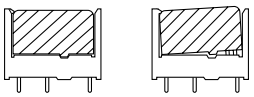
FIXING AND REMOVAL METHOD

1. Match the direction of relay and socket.

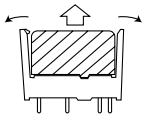


2. Both ends of relays are fixed so surely that the socket hooks on the top surface of relays.



Good No good

3. Remove the relay, applying force in the direction shown below.



4. In case there is not enough space for finger to pick relay up, use screw drivers in the way shown below.
