## SURFACE MOUNT MULTILAYER CERAMIC CAPACITORS

Automotive grade  
with Soft Termination  
NPO & X7R  
16 V TO 1000 V  
1 nF to 4.7  $\mu$ F  
RoHS compliant & Halogen Free

SCOPE

This specification describes Automotive grade X7R series chip capacitors with flexible lead-free terminations and used for automotive equipments.

APPLICATIONS

All general purpose applications  
Entertainment applications  
Comfort / security applications  
Information applications

FEATURES

- AEC-Q200 qualified
- MSL class: MSL I
- Soldering is compliant with J-STD-020D
- Increased mechanical performance
- High component and equipment reliability
- The capacitors are 100% performed by automatic optical inspection prior to taping.

ORDERING INFORMATION - GLOBAL PART NUMBER

All part numbers are identified by the series, size, tolerance, TC material, packing style, voltage, process code, termination and capacitance value.

**GLOBAL PART NUMBER**

**AS XXXX X X XXX X **B** X XXX**  
(1) (2) (3) (4) (5) (6) (7)

---

**(1) SIZE – INCH BASED (METRIC)**

0603 (1608) / 0805 (2012) / 1206 (3216) / 1210 (3225)

---

**(2) TOLERANCE**

J = ±5%  
K = ±10%  
M = ±20%

---

**(3) PACKING STYLE**

R = Paper/PE taping reel; Reel 7 inch  
K = Blister taping reel; Reel 7 inch  
P = Paper/PE taping reel; Reel 13 inch  
F = Blister taping reel; Reel 13 inch

---

**(4) TC MATERIAL**

X7R  
NPO

---

**(5) RATED VOLTAGE**

7 = 16 V                      Z = 630 V  
8 = 25 V                      C = 1000 V  
9 = 50 V  
0 = 100 V  
A = 200 V  
Y = 250 V

---

**(6) PROCESS**

N = Class I MLCC  
B = Class II MLCC

---

**(7) CAPACITANCE VALUE**

2 significant digits + number of zeros  
The 3rd digit signifies the multiplying factor, and letter R is decimal point  
Example: 121 = 12 × 10<sup>1</sup> = 120 pF

---

**CONSTRUCTION**

The capacitor consists of a rectangular block of ceramic dielectric in which a number of interleaved metal electrodes are contained. This structure gives rise to a high capacitance per unit volume.

The inner electrodes are connected to the two end flexible terminations and finally covered with a layer of plated tin (NiSn).

The terminations are lead-free. A cross section of the structure is shown in Fig.1 and Fig.2.

**ELECTRICAL CHARACTERISTICS**

**NP0/X7R DIELECTRIC CAPACITORS; NI/SIN TERMINATIONS**

Unless otherwise specified, all test and measurements shall be made under standard atmospheric conditions for testing as given in 5.3 of IEC 60068-1:

- Temperature: 15 °C to 35°C
- Relative humidity: 25% to 75%
- Air pressure: 86 kPa to 106 kPa

Before the measurements are made, the capacitor shall be stored at the measuring temperature for a time sufficient to allow the entire capacitor to reach this temperature.

The period as prescribed for recovery at the end of a test is normally sufficient for this purpose.

## SOLDERING RECOMMENDATION

Table 7

SOLDERING METHOD	SIZE				
	0402	0603	0805	1206	≥ 1210
Reflow	≥ 0.1 μF	≥ 1.0 μF	≥ 2.2 μF	≥ 4.7 μF	Reflow only
Reflow/Wave	< 0.1 μF	< 1.0 μF	< 2.2 μF	< 4.7 μF	---

## SOLDERING CONDITIONS

The lead free MLCCs are able to stand the reflow soldering conditions as below:

- Temperature: above 220 °C
- Endurance: 95 to 120 seconds
- Cycles: 3 times

The test of "soldering heat resistance" is carried out in accordance with the schedule of "MIL-STD-202G-method 210F", "The robust construction of chip capacitors allows them to be completely immersed in a solder bath of 260 °C for 10 seconds". Therefore, it is possible to mount MLCCs on one side of a PCB and other discrete components on the reverse (mixed PCBs). Surface Mount Capacitors are tested for solderability at 245 °C during 2 seconds. The test condition for no leaching is 260°C for 30 seconds.

## TESTS AND REQUIREMENTS

Table 8 Test procedures and requirements

TEST	TEST METHOD		PROCEDURE	REQUIREMENTS
Mounting	IEC 60384-21/22	4.3	The capacitors may be mounted on printed-circuit boards or ceramic substrates	No visible damage
Capacitance	IEC 60384-21/22	4.5.1	At 20°C, 24 hours after annealing f = 1 KHz, measuring at voltage $1 V_{rms}$ at 20°C	Within specified tolerance
Dissipation Factor (D.F.)	IEC 60384-21/22	4.5.2	At 20 °C, 24 hours after annealing f = 1 KHz, measuring at voltage $1 V_{rms}$ at 20°C	In accordance with specification
Insulation Resistance	IEC 60384-21/22	4.5.3	At $U_r$ (DC) for 1 minute	In accordance with specification

TEST	TEST METHOD		PROCEDURE	REQUIREMENTS
High Temperature Exposure	AEC-Q200	3	Unpowered ; 1000hours @ T=150°C Measurement at 24±2 hours after test conclusion.	No visual damage ΔC/C NPO: Within ±2.5% or 0.25 pF, whichever is greater X7R: Within ±10% D.F.: within initial specified value IR: within initial specified value
Temperature Cycling	AEC-Q200	4	Preconditioning: 150 +0/-10°C for 1 hour, then keep for 24 ±1 hours at room temperature  1000 cycles with following detail: 30 minutes at lower category temperature 30 minutes at upper category temperature  Recovery time 24 ±2 hours	No visual damage ΔC/C NPO: Within ±2.5% or 0.25 pF, whichever is greater X7R: Within ±10%  D.F. meet initial specified value IR meet initial specified value
Destructive Physical Analysis	AEC-Q200	5	Note: Only applies to SMD ceramics. Electrical test not required.	
Moisture Resistance	AEC-Q200	6	T=24 hrs/per cycle; 10 continuous cycles unpowered. Measurement at 24 ±2 hours after test condition.	No visual damage ΔC/C NPO: Within ±3% or 3 pF, whichever is greater X7R: Within ±15%  D.F. Within initial specified value IR Meet initial specified value

TEST TEST METHOD PROCEDURE REQUIREMENTS

Terminal Strength	AEC-Q200 22	With the component mounted on a PCB obtained with the device to be tested, apply a 17.7N (1.8Kg) force to the side of a device being tested. This force shall be applied for 60+1 seconds. Also the force shall be applied gradually as not to apply a shock to the component being tested. * Apply 2N force for 0402 size.	Magnification of 20X or greater may be employed for inspection of the mechanical integrity of the device body, terminals and body/terminal junction. Before and after the test, the device shall comply with all electrical requirements stated in this specification.
-------------------	-------------	--	---

Beam Load Test	AEC-Q200 23	Place the part in the beam load fixture. Apply a force until the part breaks or the minimum acceptable force level required in the user specification(s) is attained.	≤ 0805 Thickness > 0.5 mm: 20N Thickness ≤ 0.5 mm: 8N ≥ 1206 Thickness ≥ 1.25 mm: 54N Thickness < 1.25 mm: 15N

**REVISION HISTORY**

REVISION	DATE	CHANGE NOTIFICATION	DESCRIPTION
Version 4	May 21, 2024	--	- Add I210/NPO/630V/4.7nF to 33nF - Add I210/NPO/1000V/4.7nF to 22nF
Version 3	Nov. 28, 2022	-	- Update Biased Humidity and operation life requirements.
Version 2	Dec. 21, 2020	-	- Add X7R product range, 0603, 1nF to 15nF, 16 to 100V
Version 1	Dec. 04, 2018	-	- Add 0603/ 22nF to 100nF
Version 0	Oct. 05, 2017	-	- New

## LEGAL DISCLAIMER

YAGEO, its distributors and agents (collectively, "YAGEO"), hereby disclaims any and all liabilities for any errors, inaccuracies or incompleteness contained in any product related information, including but not limited to product specifications, datasheets, pictures and/or graphics. YAGEO may make changes, modifications and/or improvements to product related information at any time and without notice.

YAGEO makes no representation, warranty, and/or guarantee about the fitness of its products for any particular purpose or the continuing production of any of its products. To the maximum extent permitted by law, YAGEO disclaims (i) any and all liability arising out of the application or use of any YAGEO product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for a particular purpose, non-infringement and merchantability.

YAGEO products are designed for general purpose applications under normal operation and usage conditions. Please contact YAGEO for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property: Aerospace equipment (artificial satellite, rocket, etc.), Atomic energy-related equipment, Aviation equipment, Disaster prevention equipment, crime prevention equipment, Electric heating apparatus, burning equipment, Highly public information network equipment, data-processing equipment, Medical devices, Military equipment, Power generation control equipment, Safety equipment, Traffic signal equipment, Transportation equipment and Undersea equipment, or for any other application or use in which the failure of YAGEO products could result in personal injury or death, or serious property damage. Particularly **YAGEO Corporation and its affiliates do not recommend the use of commercial or automotive grade products for high reliability applications or manned space flight.**

Information provided here is intended to indicate product specifications only. YAGEO reserves all the rights for revising this content without further notification, as long as products are unchanged. Any product change will be announced by PCN.
