

SPEED SLOT carbide hole saws

Extremely powerful

Execution:

- High-performance carbide is welded to the cutting edge to ensure durability and prevent tooth loss.
- The aggressive tooth design cuts through wood, steel, stainless steel, cast iron, fibre cement and plaster
- lateral, step-shaped opening to enable easy removal of the drill core
- Arbour and centring drills: See bi-metal hole saws art. 53847 300 to 321

Advantage:

- extremely long service life
- cuts virtually all materials with ease

Art. no.	53847 444
Diameter	44 mm
Product Group	Prod. Gr. 5KB
