

Oscilloscope Probes

Oscilloscope probes designed to match your oscilloscope

Elditest provides a complete range of oscilloscope probes, designed to meet the latest EN61010 requirements. For measurements over a wide range of applications and many oscilloscopes specification, Elditest probes will meet your needs.

100MHz / 150MHz high voltage probes

High voltage probes for accurate and safe measurements

IEC1010-2-031 2000V CAT I
IEC1010-2-031 4000V CAT I

Réf. P/N	Attn. Attn.	B. passante Bandwidth	Impédance d'entrée Input impedance	Temps de montée Risetime	Vmax. Max input Voltage	Compensation Compensation	Précision Accuracy	Longueur Length	
150MHz - 2000V CAT I									
GE3121	x100	150MHz	100MΩ	5pF	2,3ns	2000VAC + Dcmax. CAT I	10...30pF	6% (<30ppm/V)	1,2m

All probes are supplied with a complete set of accessories (spare tip, spring hook, adjusting tool, isolated cap, BNC adaptor, color rings).

Pour commander un kit complet de remplacement: ELD.109-96008
