

Adapter for thermocouples TE type K

For current clamp testo 770-2 and 770-3

Application:

Adapter for connecting type K thermocouple temperature sensors. Simply insert the adapter into the current clamp and attach a type K thermocouple temperature sensor to the adapter. Please note that the temperature measurement may only be carried out at temperatures between -20 and +500°C. The adapter allows for accurate temperature measurement as it features ambient temperature compensation.

Version:

- Measuring range -20 to +500°C
