CHANGE NOTIFICATION DESCRIPTION

Updated part list of Future PCN 43543

Commercial TVS Datasheet Characterization

The existing TVS Diode datasheets have been showed in pdf on Littelfuse website or in printed version for years.

To describe the product's electrical parameters and performance more precisely, Littelfuse lab spent efforts to characterize the products and now include more information frequently being enquired in our datasheets. The released High Reliability and Automotive TVS Diode are excluded from these updates.

This is only datasheet update, and there is no change in the product itself. Design, manufacturing, testing, packing and all stay identical to before.

TRACEABILITY

INVENTORY ACTION

Inventories at Future Electronic will not be affected.

INSTALLED PRODUCT ACTION

None Required
