

SUBITO KT internal precision measuring instrument

For internal toothing

Application:

For measuring the pitch circle diameter of internal toothing with an odd or even number of teeth, with straight or slanted tooth shapes such as involute toothing.

Execution:

- Graduated, interchangeable gauge slides, with female thread for accommodating measuring ball inserts (not included in the scope of delivery)

Delivery:

Device holder with movable probe bolt, replaceable gauge slides, measuring discs, wooden box. **Ball measuring inserts not included***. Probe bolt and gauge slides with female thread for screwing in ball measuring inserts

Art. no.	33572 008
Brand	SCHWENK
Manufacturer Part Number	16000000
Min./max. diameter of measuring range	8-12 mm
Type	KT
Measuring depth	100 mm
Number of measurement heads	1
Number of measuring pins	5
Nominal dimension of spindle	8 mm, 9 mm, 10 mm, 11 mm, 12 mm
Number of measurement discs	1
Measurement disc thickness	0.5 mm
Gross Weight	0.525 kg
Product Group	338
