

PRODUCT CHANGE NOTIFICATION

PCN#: 10610

PCN TITLE: Change of Manufacturing Location for Plating Operations

NOTIFICATION DATE: 13 January 2023

IMPLEMENTATION DATE: 01 May 2023 (subject to successful completion of the qualification test plan)

PART DESCRIPTION: Connectors, contacts, and related components plated at existing Positronic location in Springfield, Missouri, USA

AFFECTED PART NUMBER(S): All connectors, contacts, and accessories with metal-plated components may be impacted.

CHANGE DESCRIPTION:

Currently Positronic has three facilities in the US (all in Missouri):

Eldon plant 1325 N Eldon Ave, Springfield

The company's primary manufacturing location

Campbell plant 423 N Campbell Ave, Springfield

Houses corporate offices and plating operations

Mt Vernon plant 601 W Hayward Dr, Mt Vernon

Houses injection molding machines and e-commerce operations

Construction is nearing completion at the Eldon plant that will allow for the consolidation of the Campbell and Mt Vernon plants by mid-2023. These two facilities will be closed, and their operations relocated to the newly expanded Eldon plant.

Specific to this PCN, the plating line currently in operation at our Campbell plant will be decommissioned, and the items formerly plated at that facility will be plated at our Eldon plant utilizing new plating equipment. Positronic will continue to use external plating vendors as appropriate.

REASON FOR CHANGE: Consolidation of operations maximizes the use of the Eldon plant, eliminates the need for daily intercompany transfer of material, and minimizes waste. The change also replaces aging plating equipment at our Campbell plant in favor of new equipment leveraging the latest in modern plating technology.

PERFORMANCE IMPACT: We anticipate no detrimental performance impact because of these changes. We will be running both plating operations in parallel until such time as our new plating line can successfully absorb the full demand to ensure no adverse impact to lead times. We may also leverage our existing, qualified external plating vendors as required.

QUALIFICATION DATA: A comprehensive qualification plan for the new plating operation has been created and will be executed as soon as the new plating equipment is installed and functional. A summary of the

qualification plan and the results will be available to customers one week prior to the implementation date. No manufacturing location changes will be made until the full qualification plan has been completed successfully.

DISTINGUISHABLE CHARACTERISTICS: There will be no difference in physical appearance between items plated on the existing plating equipment versus those plated on the new equipment.

Asia +65 6842 1419

PCN CORRESPONDENCE: pcn@connectpositronic.com

**The implementation start date is the projected date that customers may begin to receive changed product. Based on the rate of inventory depletion of current product, the implementation date may be later, but not earlier, than the stated date. Although customers should be prepared to receive changed product on this date, Positronic may continue shipping current product until a time in which the inventory has been depleted. This would result in current product being shipped to customers after the stated implementation date.*
