Our Story

User comfort, performance and best value

With a wealth of industry experience, Tacwise delivers the most complete range of quality stapling and nailing products, from DIY through to all-professional models and consumables.

Using our extensive knowledge, we build class-leading tools and fasteners for world markets with a focus on user comfort, performance and best value.

Productivity and satisfaction are at the very heart of our mission, enabling users to do and achieve more. Our cordless tools are perfect for convenience without the hassle of wires or cables.

Care for the environment

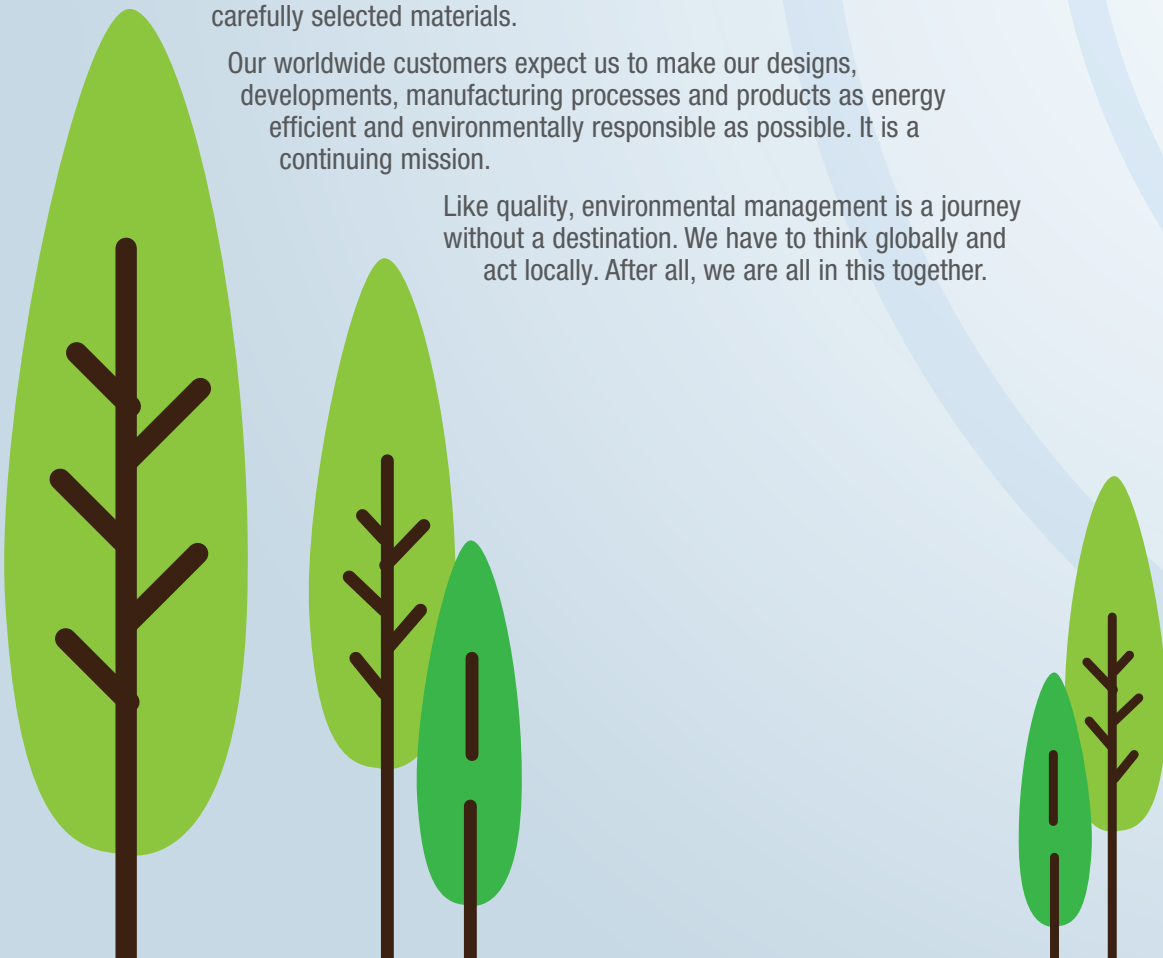

We're stripping out single-use plastic without compromising on protective packaging and we plan to do much more. We'll accelerate our efforts to find more, new ways to reduce, reuse and recycle.

Our tools can be easily disassembled to allow for specific recycling, an example being our tackers, which are screwed together whilst others are mostly welded or pressed together.

Products are designed to achieve strength and longevity through carefully selected materials.

Our worldwide customers expect us to make our designs, developments, manufacturing processes and products as energy efficient and environmentally responsible as possible. It is a continuing mission.

Like quality, environmental management is a journey without a destination. We have to think globally and act locally. After all, we are all in this together.

Repair, reuse and recycle

We must all be more responsible and shift away from the global 'throw away' society. At Tacwise we have made it easy and inexpensive to service our air tools by yourself. Simply follow the step-by-step video instructions and quickly identify and purchase the parts you need from Tacwise.com.

What is Germ-Savvy[®]

Our Germ-Savvy[®] antimicrobial agent is added to external plastic parts during manufacture to provide protection for the lifetime of the product. It kills up to 99% of bacteria. It's ISO certified, making it highly credible. With no price premium.

Look for the Germ-Savvy symbol throughout this catalogue.

Europe's widest quality range

Tacwise has the widest quality stapling, nailing and gluing programme to tackle virtually every fastening challenge.

The dominant brand associated with hand and electric stapling/nailing tackers within the UK market. We have the widest range of quality industrial fastenings and pneumatic tackers in Europe and 60+ years of knowledge and experience. Utilising all of our expertise we continue to create class leading tools and fasteners for the whole of Europe and beyond.

NEW

61 New Products

Constantly searching for better consumer solutions, once again we are proud to present some very exciting new products for 2024. Powerful and with great user features we lead with the Z2 family of hand tackers and have refreshed our larger models with the Z4 and Z5 ultra lightweight tools. As well as a rather special cable tacker, the Z-CT Duo. Each of these are bringing something quiet new to the market place.

We are also introducing two excellent cordless staplers/nailers with a 12V or 20V battery, capable of firing 91 Series staples and 180 (18G) nails. Dovetailing into this is our new 20V safety battery, with includes a dedicated on/off safety switch and is fast charging.

More information and imagery can be found in the relevant pages of this catalogue.

Hand Tackers

We've added 2 new lightweight additions to the Z2 range, plus our 2 professional Alu stapler/nailers (Z4 and Z5). And Z-CT Duo cable tacker.

8 new items

Corded Electric Tools

Presenting 2 new compact corded tools packed with features and 4 new bundles with fastenings included.

6 new items

7 new reliable and versatile products, including the 90mm coil nailer and 90mm 21° inclined strip nailer.

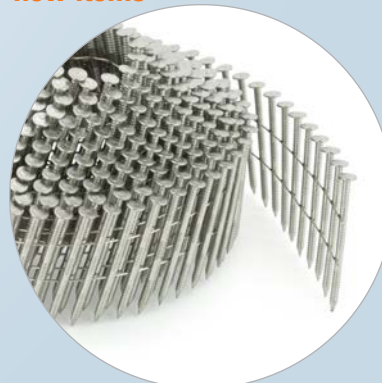

7 new items

Coil & Strip Nails

Our 4 new stainless steel coil nails are ideal for external applications with long-lasting corrosion protection. Plus 6 new strip nails.

11 new items

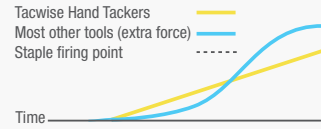

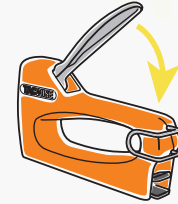

Hand Tackers | Stapling up to 8mm

Hand Tackers Z Series

Loaded with features

Tacwise incorporate many great features into our hand tackers, making these high quality dependable tools a pleasure to use. The Less Effort feature avoids the uncomfortable 'snap' when firing and reduces hand strain. All models include a bottom loading magazine for hassle-free use, along with a lock-down handle and staple viewing window as standard. In addition, all our tackers are designed for disassembly – making them easy to recycle.

Less Effort

Z2 53-13T Transparent **NEW**

Z2 53-13T Staple Tacker 53/4-8mm 13/4-8mm

Professional Code: 1728 Includes: 300pcs 53 staples

53 Staples 4-8mm (Capacity 105)	0.19kg	Hanging Retail Box	Trade = 6 Units Transit = 36 Units
13 Staples 4-8mm (Capacity 110)			

Stylish, compact and lightweight. Built for the professional and hobby user. The frosted transparent design is paired with outstanding engineering. Takes the very popular 53 & 13 series staples.

Replaces code: 0858

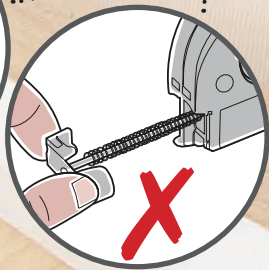

Z2 53-13L Lightweight **NEW**

Perfect for DIY

Powerful and super lightweight. At just 0.18kg, this polymer-bodied tool is tough yet comfortable to use for long periods of time.

Attention to the detail

At Tacwise we pride ourselves on adding details and features to our tools that benefit and enhance the user experience.

Z2 53-13L Staple Tacker 53/4-8mm 13/4-8mm

Z2-53 4-in-1 Metal Staple/Nail Tacker (code: 1218)

- 53/4-8mm 13/4-8mm 140/4-8mm 53F/4-8mm

Belt Hanger

A Special Margin Guide

A great feature aiding the accurate placement of staples. The margin guide is completely adjustable, it also has the added benefit of being removable when not required. The Z2 tacker has a metal outer body and a full-steel chassis, with a hardened steel magazine rail to avoid wear as the staple strip travels.

Z4-140 4-in-1 Tacker **NEW**

Professional with a narrow crown staple option

This powerful yet lightweight aluminium-bodied tool can fire 4 different types of fastenings without any need for adjustment. This is the first hand tacker on the market which features the option of using the professional narrow crown gimping staple (91 Series), making it perfect for a variety of professional tasks that require a more discreet staple finish.

Lightweight Aluminium Die-Cast

Lock-Down Handle

Staple/Nail Viewing Window

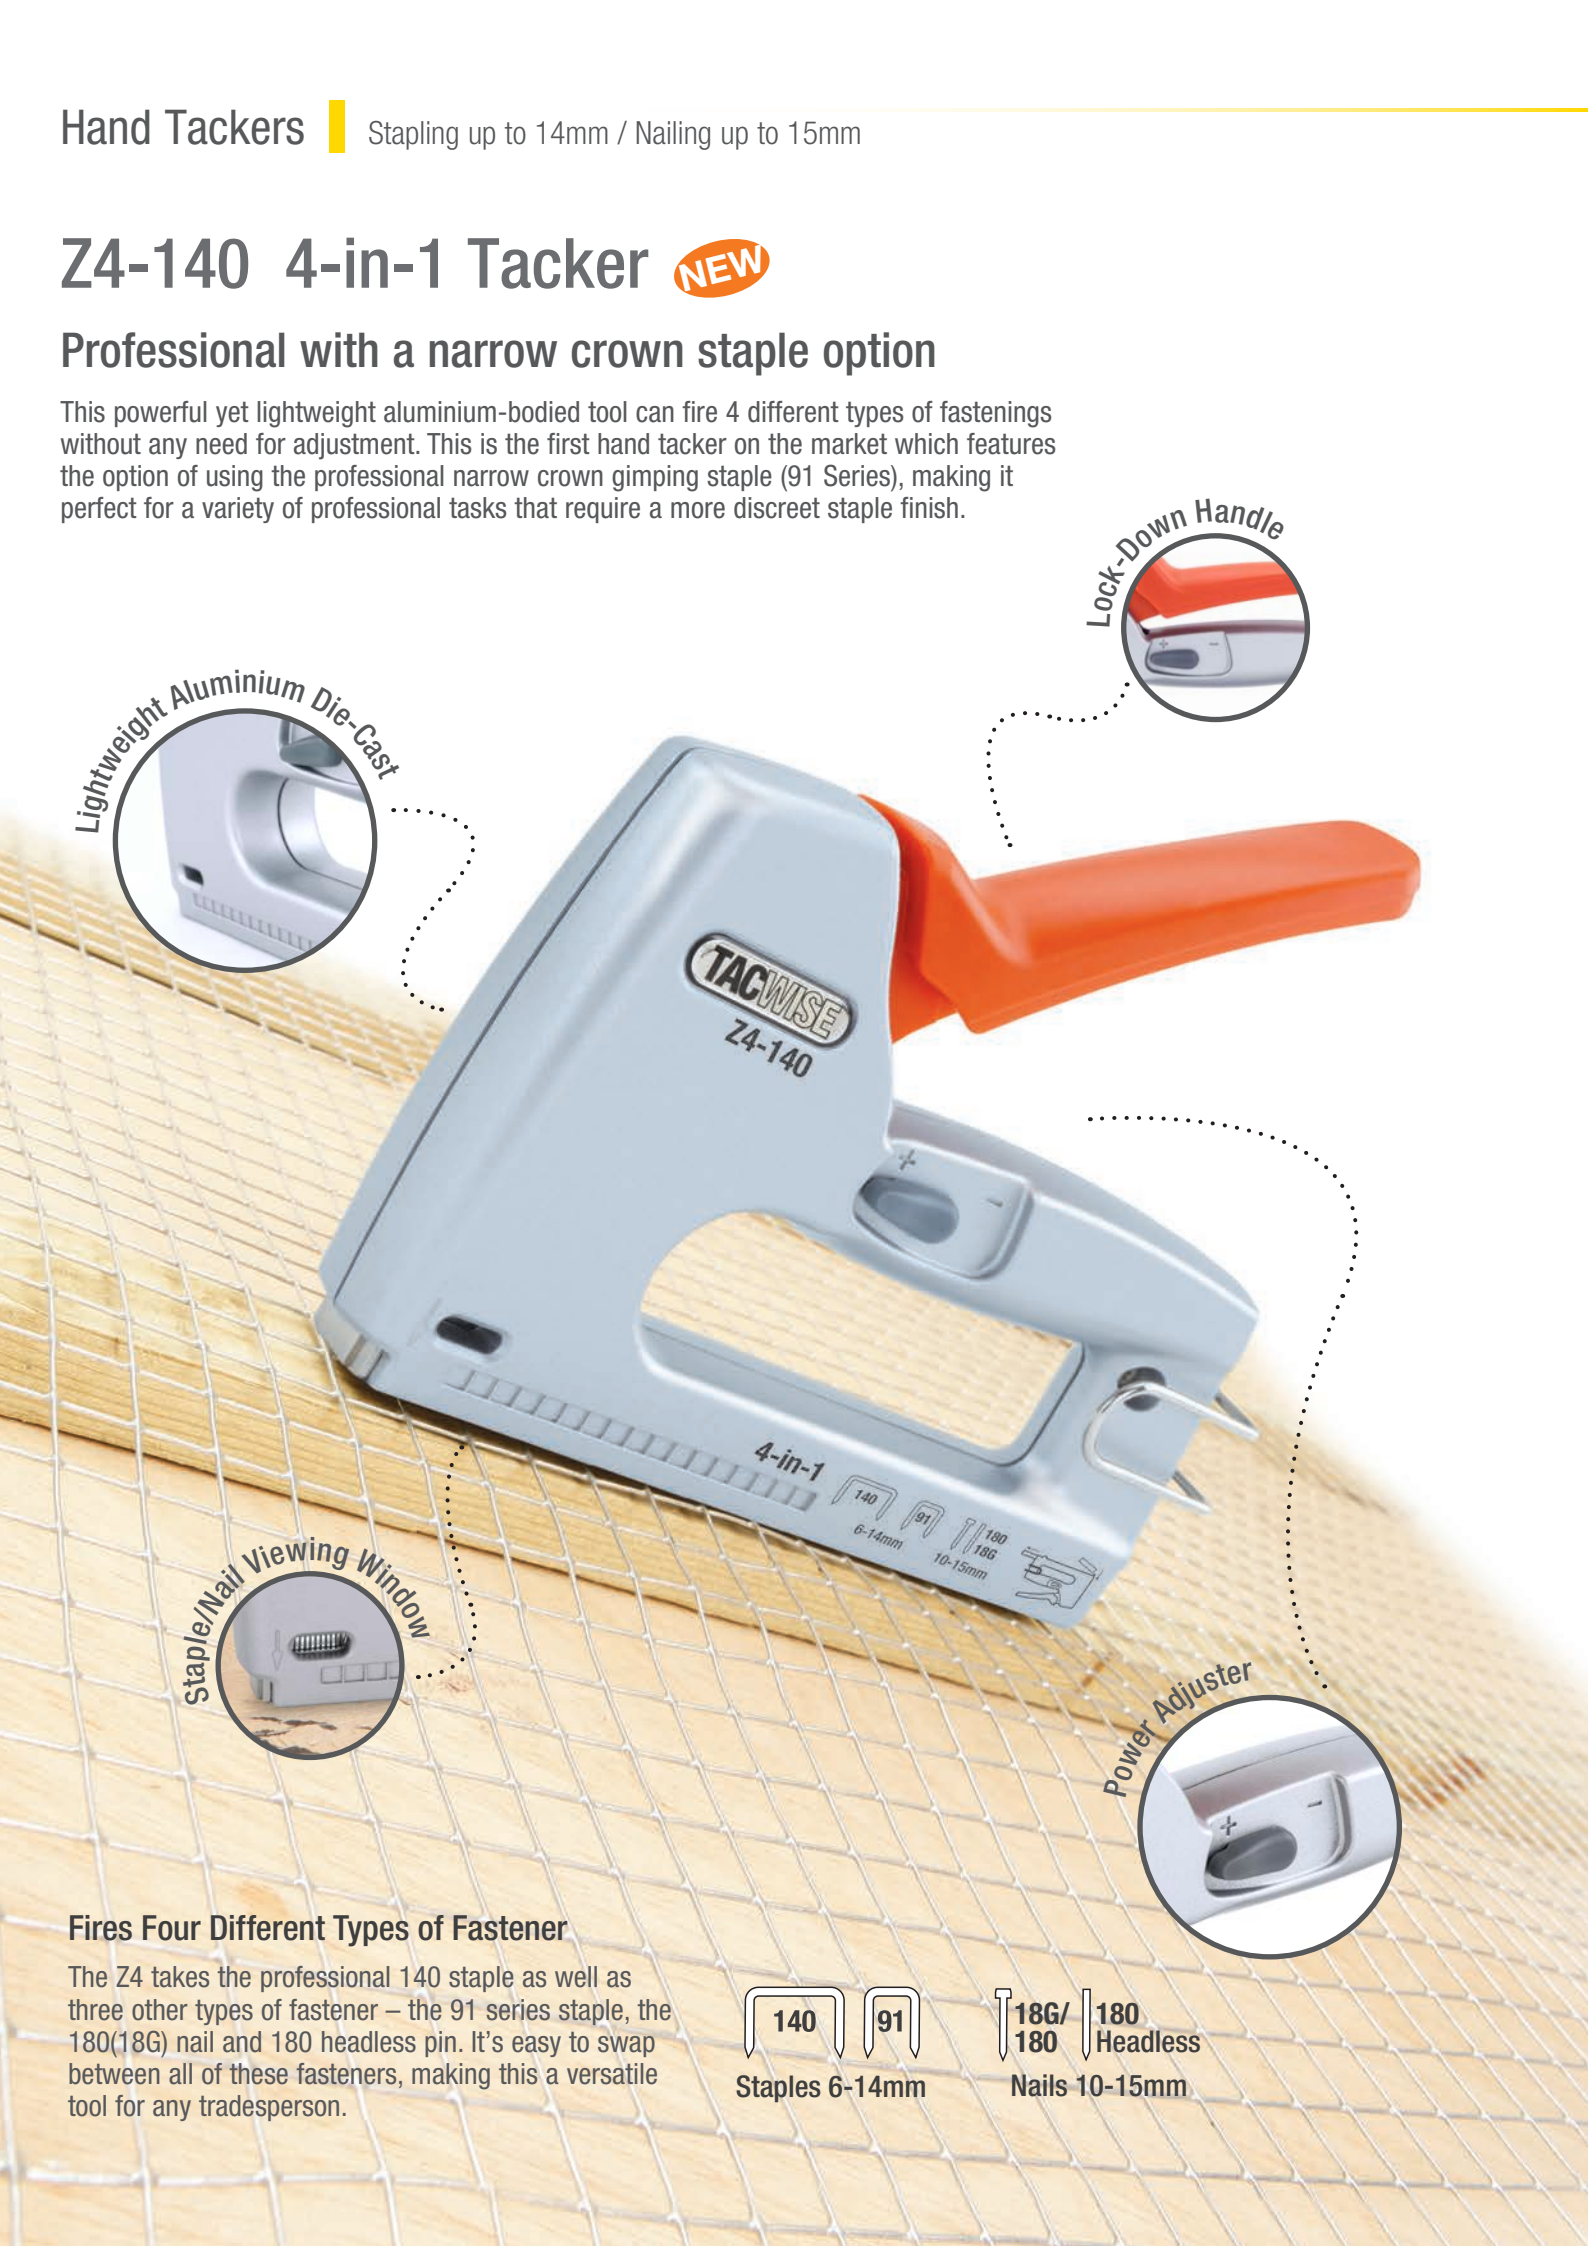

Power Adjuster

Fires Four Different Types of Fastener

The Z4 takes the professional 140 staple as well as three other types of fastener – the 91 series staple, the 180(18G) nail and 180 headless pin. It's easy to swap between all of these fasteners, making this a versatile tool for any tradesperson.

140 **91**

18G/180 **180**
Nails 10-15mm
Headless

Z4-140 4-in-1 Metal Staple/Nail Tacker

140/6-14mm 91/6-14mm 180(18G)/10-15mm 180/15mm headless

Professional			
Code: 1747	Includes: Margin guide	Hanging Retail Box	Trade = 6 Units Transit = 12 Units
Code: 1764	Includes: Z4 tacker, 2000pcs 140 staples, 2000pcs 91 staples, 2000pcs 180 nails	Plain Box	Trade = 1 Unit Transit = 6 Units

- 140 Staples 6-14mm (Capacity 85)
- 180(18G) Nails 10-15mm (Capacity 90)
- 0.64kg
- 91 Staples 6-14mm (Capacity 100)
- 180 Headless Pins 15mm (Capacity 90)

This versatile staple and nail gun is suitable for carpets and underlay, netting and wire fencing, plastic sheeting, breather membrane, insulation and many more. Perfect for the flooring trade as it combines the common 140 staple and 91 gimping staple within one tool.

Replaces codes: 0806 / 0807

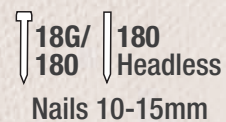

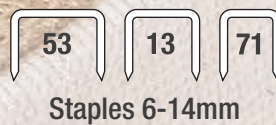

Hand Tackers

Stapling up to 14mm / Nailing up to 15mm

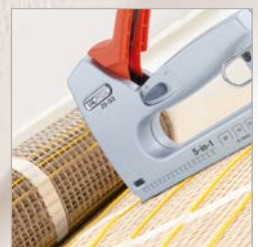

Fires Five Different Types of Fastener

A fantastically versatile tacker firing five types of fastener without need for adjustment, including three types of staple, a brad nail and a headless pin.

5-in-1 Ultimate Versatility

The first all professional tool to take three variations of staple including the important 71 type upholstery staple.

Z5-53 5-in-1 Tacker **NEW**

Professional staple & nail gun with a specialist upholstery staple option

Powerful and ultra lightweight as just 0.64kg (1.4lb), this aluminium-bodied tool is perfect for professional trades and serious DIYers wanting a comfortable, easy to use tool for an enormous range of applications.

Z5-53 5-in-1 Metal Staple/Nail Tacker

Hand Tackers | Cable stapling up to 14mm

Z-CT Duo Cable Tacker **NEW**

Professional tacker for securing both 4.5mm & 6mm cables

Just like Z4 and Z5 staple tackers, the Z-CT Duo is built from super-lightweight aluminium and weighs in at just 0.6kg (1.3lb). Switching between staple sizes and lengths does not require any adjustment and there is a pressure control to assist when stapling into hard or soft wood. Perfect for a wide variety of professional low voltage cabling tasks that require precision. Uses the most advanced die-casting methods, meaning this tool has fewer moving parts for increased reliability.

Ultimate Low Voltage Cable Fixing

The first ultra lightweight all-professional tool for many staple variations.

Colour coded

Useful and convenient for quickly selecting the correct fastenings for Tacwise and other popular tools.

Cordless Nailing & Stapling

Stapling up to 12mm / Nailing up to 10mm

Cordless 4V

Lightweight & Convenient

Versatile and lightweight staple & nail guns providing accurate results; the tools in the Tacwise 4V cordless range are rechargeable via USB for convenience. Suitable for a wide range of DIY, hobby and more ambitious tasks at home, in the garden and at school.

Hobby 53-13EL

Suitable for a variety of DIY and hobby projects, the Cordless 4V Hobby 53-13EL is a lightweight and convenient staple and nail gun. With a storage bag, handy belt hook, safety contact tip, a viewing window for fastenings, an LED light and a safety on/off switch for effortless use and safety.

Hobby 53-13EL Cordless 4V Staple/Nail Gun

53/6-12mm 13/6-12mm 180(18G)/10mm

DIY/Semi-Pro Code: 1564 Includes: USB charging cable, 2000pcs 53 staples, storage bag

- 53 Staples 6-12mm
(Capacity 100)
- 180(18G) Nails 10mm
(Capacity 50)
- 0.68kg
- LED Work Light
- Storage Bag
- USB Charge Cable
- Hanging Retail Box
- Trade = 1 Unit
Transit = 10 Units

With an on/off LED light for precision and ease-of-use and a bottom loading magazine for switching between staples and nails without any adjustment, these 4V staple/nail guns also feature a safety contact nose, belt hook and staple/nail viewing window. The Hobby 53-13EL comes backed by a 2-year guarantee, but remember to use genuine Tacwise staples and nails as dimensions, tolerances and hardness from other sources are not always to the same Tacwise's exacting standards.

Storage Bag

Made from the same high quality material as marine dive suits, offering great protection for tools and accessories.

Cordless Nailing & Stapling

Stapling up to 12mm / Nailing up to 10mm

Cordless 12V

For hours of continuous stapling/nailing

Powered by an interchangeable 12V lithium-ion battery, our durable cordless range is ideal for busy trades and enthusiastic DIYers. Both tools in the range include great features such as a work light, safety contact nose and belt hook, as standard. Offering greater power, battery life and user comforts.

When firing this tool, even with the longest fastenings, its recoilless action is immediately obvious. Which takes the stress out of simple fixing tasks and becomes a real win, when in continuous use. Heavyweight, well balanced and loaded with great user features as standard... The hallmark of the Tacwise brand.

Carry Case

The Ranger EL-PRO carry case has been designed to be oversized to conveniently store multiple packs of staples and nails.

Comes with a UK/Euro cable/adaptor.

Compact Electric Tackers

Fast, reliable & loaded with features

The new generation of compact electric stapler & nailers, supplied with 5000 staples and 2000 nails. Staple and nail function in one tool with a bottom loading magazine for easy access and simple switching between staples and nails of various leg lengths without any adjustment. Also featuring an LED work light and a long 2m power cord for ease of use.

Designed with safety in mind, these tools have an on/off power switch, trigger lock mechanism and safety contact nose, all of which must be activated for the tool to fire. Both these tools come with an interchangeable plug for UK and Euro power outlets, fitted ready for UK use.

Pro Air Tool Magazine/Quick Release Nose Gate

Angled Nose For Greater Access

An Unrivalled Performance

400ELS is a little different from the other Tacwise electrics. The key feature is its angled magazine which makes the tool extremely compact and capable of firing into very tight spaces. It also features a unique, removeable wire stand, which means that the tool is in the upright position 'ready to go' when used in tasks such as securing floor boards and boarding out.

Tough Storage/Carry Case

All our heavy-duty electric tools come supplied in a sturdy carry case.

12 Volt Li-ion Battery

This fast charging, interchangeable battery can be used in any of our 12V range.

Code: 1582 – Battery only

High output, performance glue gun

This cordless Lithium-Ion powered glue gun gives you independence and working flexibility and is ideal for frequent tasks that call for accuracy and efficiency. Super-fast 60 second heat up time dispenses glue at a high output of 360g/h. Ergonomically designed, easy to use with a battery-powered base providing a sturdy platform to keep the gun upright eliminating any glue leaks.

H12-12 Cordless 12V Hot Melt Glue Gun

Speed and durability

For the hobby and professional alike, Tacwise hot melt glue guns and adhesives deliver quality results and bond a wide variety of materials quickly and efficiently.

Corded Glue Guns | Gluing up to 11.75mm

Corded 150 & 202 Glue Guns

For hot and cool melt gluing

Our corded glue guns offer fast, reliable heating, tough polymer housing with ergonomic grips for comfort and an integrated stand for resting the glue gun in between applications.

150 Cool Melt Glue Gun

Semi-Professional Code: 0465 Includes: 2pcs 7.4mm x 100mm clear glue sticks

 Diameter/Length
7.4mm x 100mm

 0.3kg

 Retail
Box

 Trade = 12 Units
Transit = 36 Units

Safe, compact gun, ideal for hobby use, arts and crafts or general low volume applications. Cool melt offers a safer alternative with the adhesive running at a much lower temperature.

Rubber nose protector

Illuminated on/off switch (model 202)

Pressure touch feed system

150 & 202 Tool Features

The 150 and 202 models have handy features including insulated rubber nose protectors, on/off switches (illuminated for 202) and pressure touch feed systems for speed and reliability.

202 Hot Melt Glue Gun

Semi-Professional Code: 0466 Includes: 1pc 11.75mm x 100mm clear glue stick

 Diameter/Length
11.75mm x 100mm

 0.5kg

Air Nailing & Stapling

34 quality, high performance tools

We believe that design and manufacturing innovation is the key to success and we continue to refine our designs to bring you the very best tools within their class. Our aim is to develop new standards of performance utilising the most advanced aluminium, magnesium and titanium materials, to define products that do more than simply function – but that perform better and last longer.

Built for the professional

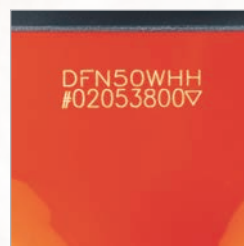

Tacwise is committed to creating the ultimate fastening product range from hand, corded, cordless and air powered equipment, combined together to provide the widest quality tools and consumables programme in Europe.

Loaded with features

Each with their own powerful features, Tacwise air tools are carefully designed for user safety, convenience and durability.

Many tools include a flip open quick release nose gate for clearance of a fastener, in the unlikely event of a jam.

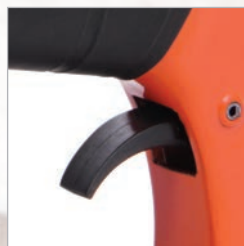

Reload indicators and rubber noses to avoid damaging softer timbers. Easy reference serial numbering makes re-ordering consumables and replacement parts easy.

Handy and easy to use controls for depth adjustment make precision tasks simple.

This small lever allows the user to quickly switch between single shot and contact trip (bump fire).

Quick release magazines of different styles mean ultra fast re-loading.

General Purpose & Upholstery Staple Guns

7 High performance coil nailers

Unrivalled

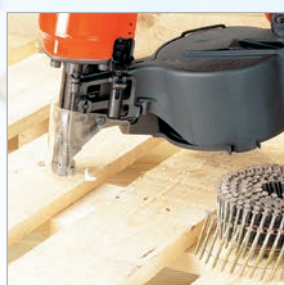

Most Tacwise coil nailers fire 4+ nails per second and can be used single-handedly. This is because lightweight magnesium is used to manufacture many of the tool bodies and triple hardened internal parts facilitate rapid firing and excellent durability. Ergonomic design provides great balance and comfort. Neat touches, such as external top cap crash bars help to ensure less downtime than other nailers.

Versatility

Popular for traditional nailing applications such as building sheds, fence panels and pallets. Coil nailers are a brilliant time-saving solution for any number of nailing applications where speed and efficiency are desirable. High capacity magazines contain a large volume of nails and offer continuous effective operation.

Increasingly demanded within the construction industry, the ability to fire up to 400 nails without re-loading increases productivity and makes coil nailing the preferred option compared to strip nailers, which only load around 100 nails at a time.

All Tacwise coil nailers up to 90mm are light enough for single-handed operation.

Coil Nailers

Serious About Coil Nailing

Tacwise places a great deal of focus on this important product category, with an extensive range covering most major and niche applications. We also have a comprehensive fastening programme to meet the demands of our dealer network and their largest users.

50mm Mini Coil Nailer

Production Line Code: DCN50LHH2

2.1 Conical Coil Nails 27-50mm

70-120

1.5kg

Retail Box

Trade = 1 Unit
Transit = 5 Units

An exceptional tool for 2.1 diameter round head nails. Weighing 1.5kg it will still countersink a 45mm ring shank nail. Compact design with a single or bump fire trigger. Very popular in the fencing, shed and flooring industry. Will also load plastic collated coil nails 27-50mm. Tool now supplied in silver colour and not orange.

55mm Coil Nailer

Production Line Code: FCN55V BEST VALUE

2.1-2.5 Flat & Conical Coil Nails 25-57mm

70-120

2.4kg

Carry Case

Trade = 1 Unit
Transit = 4 Units

The FCN55V Coil Nailer allows you to change between both conical and flat top coils, without the need for adjustment. Supplied with a newly improved lightweight magazine, offering extra strength and reliability. Lightweight at just 2.4kg, this tool can fire up to 57mm nails with ease.

57mm Coil Nailer

Production Line Code: GCN57P BEST VALUE

2.1-2.3 Flat Coil Nails 25-57mm

70-120

2.7kg

Carry Case

Trade = 1 Unit
Transit = 4 Units

An extremely heavy duty workhorse, this tough production line tool has a highly developed construction and specification, firing approximately 400 nails without reloading. Contact trip trigger. Suitable for exhibition, pallet, crate and packaging industries.

70mm Coil Nailer

Production Line	Code: GCN70V	BEST VALUE
-----------------	--------------	------------

2.3-2.9 Flat Coil Nails 40-70mm	70-120	3.7kg	Carry Case	Trade = 1 Unit Transit = 2 Units

This tough production line tool has a highly developed construction and specification, firing up to 300 nails without reloading. Contact trip trigger. Tool ideal for the pallet and packaging industries.

83mm Coil Nailer

Production Line	Code: HCN83P	BEST VALUE
-----------------	--------------	------------

2.5-3.3 Flat Coil Nails 40-83mm	70-120	3.9kg	Carry Case	Trade = 1 Unit Transit = 2 Units

Robust traditional tool for reliable and tough continuous nailing. Especially hardened working parts ensure a long and productive life. Developed for the rugged pallet and case industries in particular.

90mm Air Coil Nailer

Production Line	Code: JCN90V	BEST VALUE
-----------------	--------------	------------

NEW

2.5-3.3 Flat Coil Nails 50-90mm	70-120	3.5kg	Carry Case	Trade = 1 Unit Transit = 2 Units

Extremely versatile, this tool accepts a wide range of nail diameters and lengths, firing up to 275 nails in a single or bump firing mode. Super lightweight magnesium alloy body for the ultimate power to weight ratio. Constructed for a range of heavy-duty and manufacturing applications.

Air Coil Nailers

Nailing up to 65mm

High Durability Driver Blade

Counter Sinking Adjustment

Drives 22 Different Nails Without Adjustment

65mm Coil Nailer

Production Line Code: HCN65P BEST VALUE

2.3-2.9 Flat Coil Nails 32-65mm

70-120

2.5kgs

Carry Case

Trade = 1 Unit
Transit = 4 Units

Outstanding power to weight ratio. Sinking a 65mm ring nail, this tough production line tool accepts both reduced head and standard (7mm diameter) head nails. Fires up to 350 nails without reloading.

Put to the test

We admit it; we're tough on our products. We have to be when they're used in busy industrial environments. They need to be able to withstand the toughest treatment, which is why we painstakingly stress test every new item and why we then manually test every single tool.

Outstanding Quality and Performance

Sophisticated progressive tooling, intelligent electronic engineering and a commitment to precision and detail, create the greatest air tacker programme available worldwide. Our dedication to quality begins in the initial stages of design with every component machined to extraordinary precision for years of trouble-free use.

High Performance Coil Nails

Increasingly demanded within the construction industry, the ability to fire up to 400 nails without re-loading increases productivity.

Variations of air tool triggers

Any tool likely to be used to fire higher volumes of fasteners at speed will almost always be capable of bump firing or (in the case of very small upholstery type tools) require no additional safety system other than the standard single or double trigger. A sequential or single shot trigger will usually be fitted where exact placement of the fastener is most important.

Sequential firing

This system also requires the nose safety to be depressed against the surface. However, this **MUST** be done prior to activating the trigger or the tool will not fire. This means that even if the trigger is held up, the tool will not fire if the safety contacts a surface either accidentally or on purpose.

With a sequential safety it is possible for the tool to continue to be fired all the time the nose safety is depressed against the work surface. Once released the exact same sequence (hence sequential firing) must be repeated in order to fire any additional fastenings.

For speed firing, you may choose to leave the nose pressed against the work surface with the nose safety depressed and slide the tool along the work piece whilst activating the trigger.

Safety trigger

This is purely a safety locking device whereby the main trigger cannot be activated until the secondary trigger is depressed.

Single shot firing

This safety mechanism will only ever allow one fastener to be fired at a time. To fire the next fastener, the nose safety needs to be lifted from the work surface and the trigger allowed to reset.

Contact trip (bump firing)

This allows a fastener to be fired whenever both the nose safety trip and trigger are activated simultaneously. Consequently, fasteners can be fired at speed by holding up the trigger and repeatedly bumping the nose against the workpiece (referred to as bump firing). Effectively the tool drives a fastener each time it is 'bumped'.

The contact trip (nose safety) still prevents a fastener from being fired if it is not depressed against the work surface, however, if the trigger is activated and the nose safety trip accidentally touches against an object or person, a fastener will be fired. Therefore, **UNDER NO CIRCUMSTANCES** should an operator hold or carry a tool around with the trigger depressed.

Unless reasonable downward pressure is maintained on the nose safety after firing, it is possible for certain tools to recoil back from the work surface and then fire again on re-contact (only if the operator continues to hold up the trigger).

To prevent this from happening, these tools should be allowed to recoil far enough to release the contact trip and avoid a repeat cycle of the driver, which fires a fastener. It is possible to purchase a single shot trigger (usually red) for most contact trip tools in the Tacwise range – please contact our service department for details.

Choosing the correct fastening length

The type and thickness of the material you are using will determine the length of staple or nail that is needed.

General Rule

When stapling and nailing, the fastener should be 3 times longer than the material to be fixed. If you are nailing, a further 5mm should be added to the length of the nail.

Hardwood/Material

When stapling and nailing into hardwood, a staple that is twice the depth of the material you are fixing will be adequate. If you are nailing make sure that the nail is 3 times the length of the material.

Thin Material/Fabric

When stapling into thin material or fabric, a staple that is 4mm longer than the material is perfect. When nailing, choose a nail that is 6mm longer than the material.
