

Hexagonal angled screwdriver set stainless steel, 9 pieces

Long version with ball head, WERA hex-plus profile

Execution:

- Hexagonal ball head on the long wrench side
- Made completely from stainless steel

Advantage:

- Hex-Plus profile provides a larger contact surface with reduced notch effect. Damage to the screw head is prevented while simultaneously achieving up to 20% higher transmittable torque.
- Ball end profile also enables slightly slanted screw connections in hard-to-reach areas

Delivery:

In lockable plastic holder

Art. no.	52139 400
