

# EasyMx PRO v7 for Tiva C Series MCU card with TM4C129XNCZAD

PID: MIKROE-1620

The Default MCU card that comes with the EasyMx PRO™ v7 package. It contains TM4C129XNCZAD microcontroller which is loaded with on-chip modules and is a great choice for both beginners and professionals. After testing and building the final program, this card can also be taken out of the board socket and used in your final device.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.  
 ISO 14001: 2015 certification of environmental management system.  
 OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).

## Specifications

Type	7th Generation
Architecture	ARM (32-bit)
MCU Memory (KB)	1024
Silicon Vendor	Texas Instruments
Pin count	212
RAM (Bytes)	262144
Supply Voltage	3.3V
