Engineer Change Notice

关于 HRB1 产品的更改确认

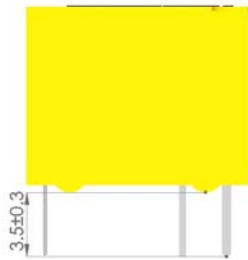

Regarding HRB1 Terminal Length Change

为进一步提高 HRB1 产品的市场适应性,提高客户工作效率,提高产品质量,我司特将对 HRB1 产品的引脚长度统一进行设计改短。

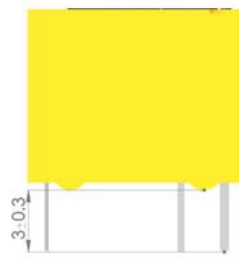

In order to improve working efficiency at customer side, we decide to make change for the length of HRB1 terminals.

如下图示:

Please kindly refer to below photo:

更改前 各引脚长度为 3.5 ± 0.3
Current: Terminal length 3.5 ± 0.3

更改后 各引脚长度为 3.0 ± 0.3
After Change: Terminal length 3.0 ± 0.3

以上更改,有如下改进点:

After change:

- 1、客户可以减少剪脚工序;
1. Customer can reduce one process: Terminal Cutting, many customer complain the terminal is too long and they need cut a little when they amount it into PCB.
- 2、可以降低因引脚过长而出现的引脚易弯、插拔扭曲等不良现象;
2. It will avoid terminal bent.
- 3、可以降低产品沾胶不良率(由于引脚长,自动封胶针头较长不易保持垂直)。
3. It will avoid sealing failure. (Because of too long terminals, the sealing gun is not so easy to keep vertical)

所做更改仅是对引脚长度的更改，不涉及其他更改，改进不会影响产品其它性能参数。可请客户放心使用。（详细更改过渡批次随单由各业务员确认）

Above change is only for the length of terminals, it will not cause any change for relay performance.

特此通知，请协助尽快予以确认回复！

Pls kindly be noticed and revert your confirmation back!
