Highlights

The Keysight 34922T is a terminal block for the 34922A 70-channel armature multiplexer, used for discrete wiring. It supports up to 20 AWG wire size for up to 100 connections or 24 AWG for 100 connections or more. Two terminal block options facilitate wiring connections to the 34922A module:

- 34922T-001 (Option 001) Terminal block with solder connectors
- 34922T-002 (Option 002) Terminal block with screw connectors

The 34922T is a detachable terminal block that provides a flexible method for connecting external wiring.
