

Rockermec™

PCB mounted rocker solution • compact • modular

DISTINCTIVE FEATURES

- Standard sealing - custom interface
- Front panel sealing to IP67
- Low below panel height
- Flexible illumination - chip LEDs on PCB
- Based on Multimec 3C/5E switches

SWITCH SPECIFICATIONS : see Multimec® 5 series.

Rockermec™

PCB mounted rocker solution • compact • modular

GENERAL SPECIFICATIONS

- Front panel sealing: IP67 to IEC 60529
- Mechanical lifecycle (sealing) : 100,000 activations
- Operating temperature:
 - ABS: -40°C to +65°C (-40°F to 149°F)
 - PC: -40°C to +85°C (-40°F to 185°F)
- Actuation force:
 - 5E: 2.0 N = solution: 5.5 N
 - 5E: 3.5 N = solution: 7.5 N
 - 5E: 6.5 N = solution: 12 N
 - 3C: 3.5 N = solution: 7.5 N
- Recommended panel thickness: 1.0 mm

MATERIALS

- Sealing: silicone
- Illuminated cap: polycarbonate
- Non-illuminated cap: ABS

- 10RM & 10QM: metal symbol
- 10R(F) & 10Q: pad printed / reverse printed
- 10A: pad printed / laser marked

HOW TO ORDER

POSITIONING OF LEGENDS ON ROCKER-ACTION CAPS

When ordering legends for caps with hinge-type cap retention system, it is important to note the position of the cap. An extra letter (U, D, R or L) needs to be added to the part number to refer to the position of the hinges in relation to the legend. See samples:

Rocker-action caps without a lens: 1A, 1B, 1M, 1ZA and 1ZB

STANDARD AND CUSTOM LEGENDS

- Standard are only certain legends on certain caps. See the table on the previous page.
- All standard pad-printed legends are white on black caps.
- All standard reverse-printed and laser marked legends are black on frosted white cap.

LEGEND ILLUMINATION

- **Option 1 - laser marked:** In case of laser marked legends an "LM" is added after the cap colour, before the legend code. We recommend using hard paint (additional "H") for increased lifetime of the paint. E.g. 1ZB16DLMH13609
- **Option 2 - reverse printed:** In case of reverse printed caps an "R" is added after the cap colour, before the legend code. Especially relevant when standard legends have both negative and positive print options. E.g. 1FS096R00009
- **Option 3 - metal symbol:** Only available for 10RM and 10QM (therefore the "M"). E.g. 10RM16059

ORIENTATION OF THE SWITCH

STANDARD LEGENDS

CAP	CAP COLOR	DIRECTION*	TYPE*	LEGEND	LEGEND COLOR*
1BS	00 Blue	D Down	LM Laser marked on soft paint	001 1	00 Blue
1DS	02 Green	U Up	LMH Laser marked on hard paint	002 2	02 Green
...	03 Grey	R Right	R Reverse printed	003 3	03 Grey
	04 Yellow	L Left		... etc	04 Yellow
	06 White	*Only for hinge-type caps			06 White
	08 Red	*In case of illumination			08 Red
	09 Black				09 Black
	16 Frosted white				... Etc
	...				

*In case of reverse printed and laser marked legends the colour of the paint

Notice: The size of the legends listed may not correspond to the actual size.

If you decide to use one of the standard legends without any adjustments (without a new cliché or programming) on another cap than designated in the table, then there is no cliché or programming cost, for this to apply the cap has to be black and the print white.

For further information on legends please contact your local distributor or MEC.

The RAL Codes mentioned are the codes nearest to the solid colors in the multimec® range.

Multimec[®] 5E

High performance tactile switches •
MIL-PRF-28855H

DISTINCTIVE FEATURES

- Momentary switches with NO or NC/NO function
- Sealed to IP67
- Robust
- Anti-rotation thanks to snap-on cap retention system
- 3 standard actuation forces: 2.0, 3.5 and 6.5 N

ENVIRONMENTAL SPECIFICATIONS

- Sealing : IP67 according to IEC 60529
- Working and storage temperature : -40 °C/+160 °C (-40 °F to +320 °F)
- Soldering :
 - through-hole : IEC 60068-2-20 8
 - surface mount : JEDEC J-STD-020E

ELECTRICAL SPECIFICATIONS

- Recommended load :
 - Gold contacts : 0.5µ-50 mA 24 VDC
 - Silver contacts : 0.5-50 mA 24 VDC
- Contact resistance : <30 mΩ - typically 10 mΩ
- Insulation resistance : >10 MΩ
- Contact bounce : <2 mS - typically 0.5 mS

MECHANICAL SPECIFICATIONS

- Standard actuation force :
 - momentary NO : 2.0 N, 3.5 N, 6.5 N
 - quiet version : 2.0 N
 - NC/NO function : 3.5 N
- Max. actuation force :
 - momentary : 115 N for 60 sec (according to MIL-PRF-22885H)
 - NC/NO : 100 N for 10 sec
- Travel : 1mm
- Lifetime : >10,000,000 cycles

The company reserves the right to change specifications without notice.

MATERIALS

- Housing : PPS UL94V0
- Actuator : PPS UL94V0
- Sealing : Silicone rubber
- Contacts spring : Stainless steel
 - Silver : +3 µAg
 - Gold : +1 µAu
- Fixed contacts :
 - Silver : SnCu + 2 µNI + 3 µAg
 - Gold : SnCu + 2 µNI + 1 µAu
- Terminals : SnCu + 2 µNI + 3 µSn100

All tolerance if not otherwise specified ±0.2 mm.

TAPE & REEL

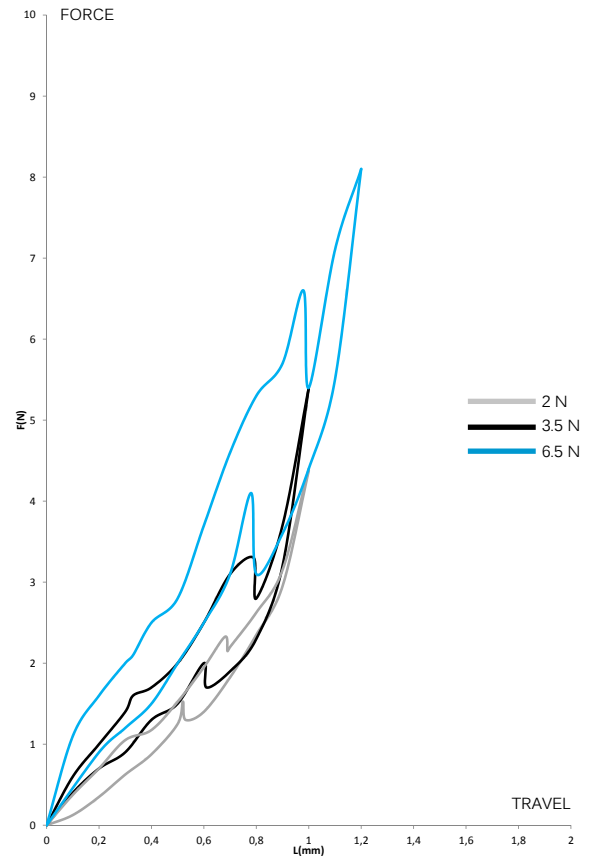

Tape and reel is available for the parts listed and has the following specifications

- Reel diameter: Ø330 mm
- Tape width: 24 mm
- Pitch: see list
- Tape and reel material: antistatic or better
- Quantity per reel: see list

PART NO.	ORDERING CODE	PITCH	QUANTITY PER REEL

USAGE GUIDELINES

HOW TO GET THE BEST RESULTS WITH MEC SWITCHES ?

These guidelines are offered to users of MEC Switches as an aid to ensure successful and reliable switch operation. Please see the technical specifications for details on operating and storage temperatures and soldering guidelines to make sure you select the best switch for your application. When wave soldering is taking place, MEC strongly recommend that the temperature profile is analyzed and compared with the temperature rating of the switch. It is also important to monitor the accumulated heat buildup from both the pre-heat zones and the solder zone.

Most standard accessories for multimec® 5 series switches are made from ABS plastic with a maximum operating temperature of 65 °C. It is strongly recommended that accessories are mounted after soldering of the switch. If this is not possible care must be taken not to overheat the accessories during the soldering process. The 1SS caps are, however, made of high temperature materials and will meet the same temperature specifications as the switches. For accessories made from other plastic materials please see multimec® 5 series technical specifications.

MOUNTING AND DISMOUNTING

If switches are to be mounted in rows it is essential that the recommendations regarding spacing are followed. PC board thickness should be 1.4 ±0.2 mm and terminal hole diameter should be 0.9 mm.

All multimec® 5 series caps are easily snapped onto the switch modules and can be changed at a later time.

A mounting tool is available for through hole multimec® 5 series switches.

SOLDERING AND CLEANING MULTIMEC® SERIES

Multimec® 5 series switches are fully sealed to IP67 specifications to minimize solder flux and aqueous based cleaning solutions from entering the switch and contaminating the contacts. The switches can be placed on the PC board with other components and wave soldered. Multimec® 5 series offers a high level of sealing, however, with aqueous solvent solutions care must be taken to avoid the worst case situation with water jets, complete immersion into a liquid with a temperature below the board or surface tension reducing additives.

Recommended cleaning methods are demineralized water. Any surface tension reducing agents, such as soap, must not be used as they risk causing a potential leakage of the switch.

SOLDERING - THROUGH HOLE VERSIONS

Hand soldering: max. 350 °C for max. 3 sec

Wave soldering: heat built up in the switch during pre-heating and soldering must not exceed the maximum operating temperature of the switch. Peak temperature must not exceed 260 °C, and soldering time is max 10 sec. (IEC 600-68-2-20 8)

SOLDERING - SURFACE MOUNT VERSIONS

For all methods - infrared, convection and vapor phase. The upper limit 260 °C/30 sec must be observed. The soldering temperature profile must have moderate temperature gradients. (JEDEC J-STD-020E)

ROHS COMPLIANCE

As of 1 July 2006 MEC has completed the conversion to RoHS compliance. For more info please see our homepage www.apem.com

TEMPERATURE LIMITS:

Switch	160 °C
Accessories	65/85/160 °C

PACKAGING

Multimec® 5 series switches are packed in rigid tubes of 50 pieces each.

A box contains 1.000 pcs.

The surface mount versions of multimec® 5 series switches with a height up to 12.5 mm can also be delivered on tape/reel.
Each reel contains 250/500 pcs.
