RE: Littelfuse 04981038HXFC, MIDI® Flexible Fuse Holder Supply Change

Dear Valued Customer,

To better serve our customers by increasing responsiveness and flexibility, by the end of Q32018 we will change our manufacturing locations for plastic components associated with the 04981038HXFC, MIDI® Flexible Fuse Holder, from an outside injection molding supplier to a Littelfuse injection molding facility.

New quality and PPAP documentation will be prepared upon completion of the transfer and available upon request.

Please let myself or your Littelfuse sales contact know if you have any questions or concerns.

Regards,

# Jeremy Glessner
