# 2 Type of change

· Change of melting wire material

## 3 Detailed description of change

New melting wire with improved mechanical properties

### 4 Reason of change

 The new melting wire prevents wire breakage as a result of multiple soldering and strong crimping in the terminals.

#### 5 Release date

The change will be rolled-out starting week 05/2018. However, the exact date of the change depends on the inventory. Furthermore, the inventory stock will be used up first.

## 6 Impact of change and recommended action

Form	No	No change in form
Fit	No	No change for dimension
Function	No	No change in function
Manufacturing	No	No change for manufacturing site
Label	No	No change on label
Packaging	No	No change in packaging

#### 7 Reference Documents / Attachments

Kind of document	Remarks
Data Sheet	

## Remarks:

The following typical properties are changing:

Typical voltage drop @ 1.0 x  $I_n$ : from 140 mV to 182 mV Typical power dissipation @ 1.0 x  $I_n$ : from 560 mW to 728 mW Typical  $I^2t$  @ 4.0 x  $I_n$ : from 2.10  $A^2s$  to 2.25  $A^2s$ 

The pre-arcing time min. and max. limits are not affected.
