UNITRONIC® PUR CP	valid from : 24.06.2008

Application

UNITRONIC® PUR CP is a flexible, screened data cable with an outer sheath from PUR. The cable is suitable for fixed installation and flexible use, but not for highly flexible applications in power chains or permanently moved machines. The screen braiding protects against electrical interference. It may be used in dry, damp and wet rooms, also outdoor.

This data and signal cable is used in computer systems, electronic control and office equipment. The outer sheath of Polyurethane is resistant to a multitude of oils and chemicals.
