

HyFlex® 11-800

What makes HyFlex® 11-800 one of the most trusted brands?

New patented technologies have been incorporated into the HyFlex 11-800 glove that result in superior fit, comfort, grip and dexterity. Combining these new technologies with Ansell's proprietary formers, patented knitting processes and geometric alterations make HyFlex 11-800 a near perfect fit to the human hand.

Key attributes and customer benefits

Technical features	Customer advantages	Customer benefits
Patented Zonz™ Knit technology 	<ul style="list-style-type: none"> Provides an improved and more ergonomic fit by releasing tension in the high stress zones of the glove. Includes open visible stitch. 	<ul style="list-style-type: none"> Causes less hand fatigue for workers resulting in less rework and higher productivity. Allows for a more breathable glove to wear.
Dropped little finger design	<ul style="list-style-type: none"> Special knitting process drops down in pinky area following the natural course of hand design. 	<ul style="list-style-type: none"> With increased comfort and fit comes higher worker acceptance and user compliance.
Special nylon liner	<ul style="list-style-type: none"> Ansell's special nylon 6.6 yarn used in knitting of the liner offers a softer feel compared to other yarns. This yarn also helps to keep moisture away from the hand. 	<ul style="list-style-type: none"> Softer feel increases worker comfort.
Sizes 6, 7, 8, 9, 10 and 11	<ul style="list-style-type: none"> Six hand-specific sizes provide customers options. 	<ul style="list-style-type: none"> More choices means all sizes of workers can be job fit, which reduces injuries due to poor fit and noncompliance.
Extra comfort cuff	<ul style="list-style-type: none"> The cuff utilises new yarn technology which provides more elasticity in cuff area for easier donning, doffing and less irritation. 	<ul style="list-style-type: none"> Gives more elasticity and recovery in wrist area providing all day comfort.
100% silicone and natural rubber latex free	<ul style="list-style-type: none"> Wrist to finger tip. 	<ul style="list-style-type: none"> Reduces potential for product contamination and skin allergies.
Launderable	<ul style="list-style-type: none"> Product will not lose its performance protection wash after wash. 	<ul style="list-style-type: none"> Reduces overall operating cost.
