

Heavy-load pallet shelf—for crossways storage

Frame for custom equipping

Application:

For the storage and retrieval of heavy individual parts on Euro pallets or in pallet frames. For equipping with pull-out shelves

Execution:

- Basic shelf comprising: 2 x support frames, 1 x back board, 1 x top shelf, add-on shelf: 1 x support frame, 1 x back board, 1 x top shelf
- Add-on shelf without sidewall. The sidewall must be repositioned when extending a basic unit with an add-on shelf.
- Floor characteristics: Flat concrete floor with a strength of at least B 25 or a stable screed no more than 35 mm thick
- Service: Why not ask our experts to help you plan and install your shelving system? We offer on-site consultations or a CAD planning service
- Planning dimensions: Sum of clear bay widths + number of frames x 80 mm frames + 2 x 20 mm base plates

Delivery:

Pre-assembled without unloading and without final assembly and fastening to the floor

Art. no.	50171 463
