Product Change Notice

Type of Change:

End of Life
Facility Change or Addition
Design Change

□ Material Change

Process Change

☑ Other- Packaging

Part Series Affected: W Series Heatsinks Part Numbers: WA-T247-101E, WV-T247-101E, WA-T220-101E, WV-T220-101E

Effective Date: August 3, 2020

the Ohmite <u>WA-T247-101E, WV-T247-101E, WA-T220-101E</u>, and <u>WV-T220-101E</u> heatsinks will be supplied on trays, as they are currently, but with the added protection of a moisture sealed bag. While the heatsinks are not MSL rated, like all electronics components, extended exposure to humidity will erode the solderability of their terminals. The process of terminal oxidation is accelerated in high humidity environments due an abundance of oxygen molecules present. This precautionary packaging improvement will reduce the effect of humidity during transport and storage. No changes to price of standard pack quantities are involved with this packaging change.

Best Regards,

Brandon Metzger Marketing Manager

CC: Kirk Schwiebert Director of Product Development
