Data Sheet Change:

Yes No

Attachment:

Yes No

DESCRIPTION AND PURPOSE OF CHANGE:

For the purpose of a data sheet information enlargement, Würth Elektronik will update the rated current value and the maximum impedance value based on new measurement data.

In order to show the latest representation in the data sheet, all products were remeasured according to an updated measurement setup. This new method of measurement is able to provide impedance values up to 8GHz with DC-bias currents until the maximum rated current of the part. Due to this, a renewal of typical curves will yield different maximum impedance values. These new measurements will be present in RedExpert and the updated data sheets.

The label update will be effective from date code 2020-01-01 or later.

This is only a data sheet and label change update. There will be no change in form, fit, function, quality or reliability of the product.
