

# 600 V MDmesh™ DM6 fast-recovery SJ MOSFETs boost efficiency and robustness

## MDmesh™ DM6 fast-recovery body diode technology improves efficiency and system reliability thanks to new lifetime killing process

Combining an optimized capacitance profile and lifetime killing process that results in a low gate charge ( $Q_g$ ), very low recovery charge ( $Q_{rr}$ ), low recovery time ( $t_{rr}$ ) and an excellent improvement in  $R_{DS(on)}$  per area, the MDmesh™ DM6 MOSFET series is today's reference for full- and half-bridge topologies.

Thanks to our new MDmesh™ DM6 series, power electronic designers are now ready for new scenarios targeting higher efficiency and very impressive power density for super robust power conversion topologies.

### KEY FEATURES

- Extremely low  $R_{DS(on)}$  \*area and  $Q_g$  and optimized capacitance profile for light load conditions
- Extremely high dv/dt
- Optimized body diode recovery phase
- Optimized softness

### KEY BENEFITS

- Extremely high efficiency performance and increased power density
- More robust power conversion in ZVS, full and half bridge topologies
- Higher operation frequencies and better thermal management
- Reduced EMI

### KEY APPLICATIONS

- Charging stations for electric vehicles
- LED lighting
- Telecom
- Servers
- Solar inverters

## MDmesh™ DM6 SERIES

### 600 V BVdss rated

ST's latest fast-recovery body diode super-junction MOSFET technology is optimized for ZVS, full- and half-bridge topologies. With a breakdown voltage of 600 V, MDmesh™ DM6 power MOSFETs are available in a wide range of package options including a TO-Leadless (TO-LL) package solution, allowing efficient thermal management.

### Efficiency test performed on 2 kW ZVS topology

## AVAILABLE POWER TRANSISTORS IN OUR HIGH-VOLTAGE, SUPER-JUNCTION 600 V MDmesh™ DM6 SERIES
