

MATERIAL

Polyamide based (PA) technopolymer, black colour, matte finish.

FEATURES AND APPLICATIONS

End-caps for square tubes with adjustable height levelling element
The assembly can be performed simply by positioning the end-cap, forcing it, inside the tube, with no need of screws or other fasteners.

NDA.Q-20 ÷ NDA.Q-25

NDA.Q-30 ÷ NDA.Q-50

The geometry of the end-cap in the part that is inserted into the tube may vary for the different dimensions.

Code	Description	B	d	h	h2	s	Tube external diameter	Tube internal diameter min-max	Tube thickness min-max	Max. static load* [N]	⚖️

* The value refers to laboratory tests carried out with a load applied vertically to the leveling element unscrewed from the end-cap of 10 mm leaning on a flat surface. The max limit static load is the value above which the load applied to the element may cause some plastic material breakage, under particular conditions of use. Obviously, a factor that takes into consideration the importance and the safety level of the specific application must be applied to this value.
