

Issue Date: March 19th, 2021

Dear Valued Customer,

This notice is to inform of a change affecting finished goods you have purchased from Littelfuse.

Description of the Change:

- We will transition the molding operations for the plastic housings of 01530007Z, 01530008Z, and 01530009Z from their existing location within the Littelfuse Piedras Negras facility to the Littelfuse Matamoros facility.
- In parallel, we have invested in replacement tooling for these molds, given their age and condition do not allow us to maintain current levels of delivery.

Reason for The Change:

- This shift in production sites is meant to allow level-loading of our overall molding demand.
- Our investment into replacement tooling is a commitment to continue to supply high quality parts in even greater availability going forward.

Effective Date of the Change:

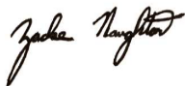

- We will halt production on the current tool and begin the transfer the end of the week of March 21st, 2021. We expect the transfer to take 2-3 weeks, during which we will not be able to produce any additional parts beyond what is currently on hand.
- Our replacement tooling will begin producing parts by the beginning of July.

What You Need to Do:

- This change will not result in a change in performance of our products, though immediate delivery will be delayed.

If you have any questions, please feel free to contact your Littelfuse Customer Service Representative or your Inside Sales Representative. We appreciate your business and our continued partnership.

Sincerely,

Zachary Naughton
Global Product Manager
