Mole-Ant Defense Deluxe

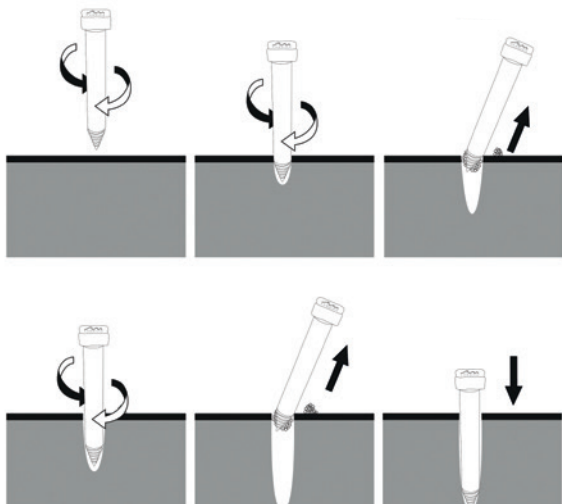

Emits tones into the soil

Inserting mole repellents into the soil can be tricky, especially when the device has a large diameter and the soil is hard, it often is necessary to dig a hole first. This is why The Mole-Ant Defense Deluxe has an integrated drilling aid. Screw it a couple of centimeters deep into the ground and pull it out again. Bit by bit you are digging a hole into which the device will fit precisely.

Under ground the Mole-Ant Defense Deluxe will emit tones and vibrations. As the ground diggers and burrowing animals depend on their acute senses of hearing and touch, they will quickly feel disturbed and will search for a quieter place.

As the device is battery operated, you may use it all year long. For changing the batteries, pulling the device out of the soil is not necessary. Simply screw off the cap and pull out the battery cylinder.

Additional information

- **Dimensions:** 5,5 x 31,5 x 5,5 cm (W x H x D)
- **Packaging dimensions:** 6,2 x 33 x 6 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 20 units per package
- **EAN:** 4260277268022

Specifications

- **Covered area:** ca. 1250 m²
- **Frequency:** 400-500Hz
- **Interval:** approx. 2 sec. on, approx. 50 sec. off
- **Batteries:** 3 x AA 1,5V (not included)
- **Material:** head: ABS, rod: aluminum
