The PST series are 3-channel, 96 or 158W, programmable linear DC power supplies. High resolution is maintained at 10mV, 1mA ($\geq 3A$). OVP, OCP, and OTP protect the PST-Series and its loads from unexpected conditions. The PST-Series are capable of independent, series or parallel operation for increased flexibility. The large LCD display conveniently displays all outputs and configurations simultaneously to simplify operation. The programmable interface allows automatic stepping, 100 set of memory and comprehensive timing operations. GPIB and RS232C interfaces, Labview drivers and SCPI compatibility allow easy ATE software development and remote control. The versatile PST-Series is ideal for high resolution, multiple output, automated operations such as production testing and rack mounting systems.
