

# OM13085: LPCXpresso board for LPC1769 with CMSIS DAP probe

## Overview

Pioneered by NXP and Embedded Artists, the LPCXpresso™ development platform includes low-cost LPCXpresso target boards to get you up and running quickly. Designed for simple, rapid prototyping and evaluation, LPCXpresso™ development boards work with the LPCXpresso IDE and other industry leading partner toolchains. LPCXpresso™ is an end-to-end solution enabling embedded engineers to develop their applications from initial evaluation to final production.

This LPCXpresso™ board is populated with the LPC1769 to demonstrate and enable evaluate of the features of the LPC1700 product series. The board includes an on-board, CMSIS-DAP compatible debug probe as well as a connector for use with 3rd party debug probes.

Order Number: **OM13085**

## Features

- LPC1769 Cortex-M3 based microcontroller
- Integrated CMSIS-DAP debug probe
- Debug probe section of the board can be snapped off to reduce board size
- 10 pin SWD connector for use with an external debug probe
- Ethernet 10/100 PHY
- Reset and ISP boot mode buttons
- Tricolor LED
- LPCXpresso/mbed debug expansion connectors

## Supported Devices

- LPC1769FBD100: 512kB flash, 64kB SRAM, Ethernet, USB, LQFP100 package
