

Light

The right lighting can make all the difference to the atmosphere of a home, office or outdoor space. That's why GET has put a great deal of thought into a range of lighting luminaires that are both aesthetically pleasing and easy to install.

For indoor use, choose between mood enhancing, decorative luminaires and more functional fittings for kitchens, bathrooms and commercial spaces.

And why stay indoors on a warm summer evening, when external lighting will create the perfect al fresco environment? GET's range of outdoor lighting solutions can illuminate gardens, walkways and doorways – or offer a little extra security.

New for this edition are fire rated downlighters and T4 mini batten fluorescent fittings.

new lighting products

Fire rated downlighters

The new range of fire and acoustic rated Downlights from GET is the ideal choice for commercial or domestic installations. Supplied in fixed, tilt or shower versions, in chrome, white or stainless steel finishes and available for mains or low voltage applications.

Downlighters – Page 121

Fire rated downlighters

Maintain fire resistance of load bearing floors for up to 90 minutes. Acoustic rating to BS EN ISO 140-3:1995 and 140-6:1998.

Downlighters – Page 121

T4 mini batten luminaires

Provide ambience to any kitchen work surface with GET's new range of T4 Mini Batten Fittings. Supplied in 275mm, 400mm, 500mm and 625mm versions, all mini battens can be interconnected directly or with the supplied link cable.

Mini battens – Page 129

T4 mini batten lighting

Quality mini battens to BS EN 60598 with CE and F Mark approval.

Mini battens – Page 129

Light | Indoor lighting | Downlighters

Our versatile downlighter range can add simple, understated ambience or direct accent lighting to any domestic or commercial area. With a wide choice of lamp types and finishes as well as ceiling, wall or stair models. Our luminaires will complement any interior styling.

The low voltage and GU10 ranges found on pages 122-123 have been colour matched with a choice of seven high quality finishes to complement our Ultimate wiring accessory range (see pages 20-57).

- Interchangeable with all square wall and ceiling fittings

LED accessories

Code	Description	Qty
GDDR	LED driver – powers up to a maximum of eight individual 1W LED luminaires	1
GDLC	1.5m LED link cable Use when operating more than 1 luminaire from GDDR driver. Requires 2 cables for 2 luminaires, 3 cables for 3 luminaires, 4 cables for 4 luminaires, etc.	1

Dimensions (mm): L167 x W39 x D30

This cable is not required when operating only one luminaire.

Typical installation

Wall versions supplied complete with mounting box.

Light | Indoor Lighting

Cabinet and undershelf range

A traditional range of low voltage cabinet lighting and mains voltage striplights. Our cabinet lights are available in 3 finishes and in single or 3 piece kit formats, the kit comes complete with electronic transformer. Striplights (page 130) are available in 2 sizes with and without switch (pull and push).

New for 2007 is a range of mini batten link lights designed for under cabinet and display lighting applications. The fittings can be linked either directly or by the extension cable enabling complete flexibility.

Features and benefits

Mini batten link lighting

All mini battens can be inter connected directly or by using the link cable (supplied)

Supplied with triphosphor fluorescent tube

Available in 5 lengths

Electronic flicker free operation

Cabinet lights

Available in single or 3 piece kit

Supplied complete with G4 lamps

Electronic dimmable transformers with thermal protection supplied with kits

Luminaires supplied with removable mounting collar for surface or flush mounting

3 finishes: white, chrome and brass

Easy to fit plug and socket system

Striplights

Available in 2 sizes (221mm and 284mm)

Slimline design

With or without switch

Switched versions available with push or pull switching

Lamps: Striplights
 Striplights utilise linear incandescent lamps and are perfect for providing complementary lighting. They are normally used under cabinets or cupboards in kitchens.
 Features:
 • Suitable for wall/ceiling mounting undershelves in kitchens etc
 • Slimline design

Shaver lights (lamp included)

GSHVLIT

GSHVLITFL2

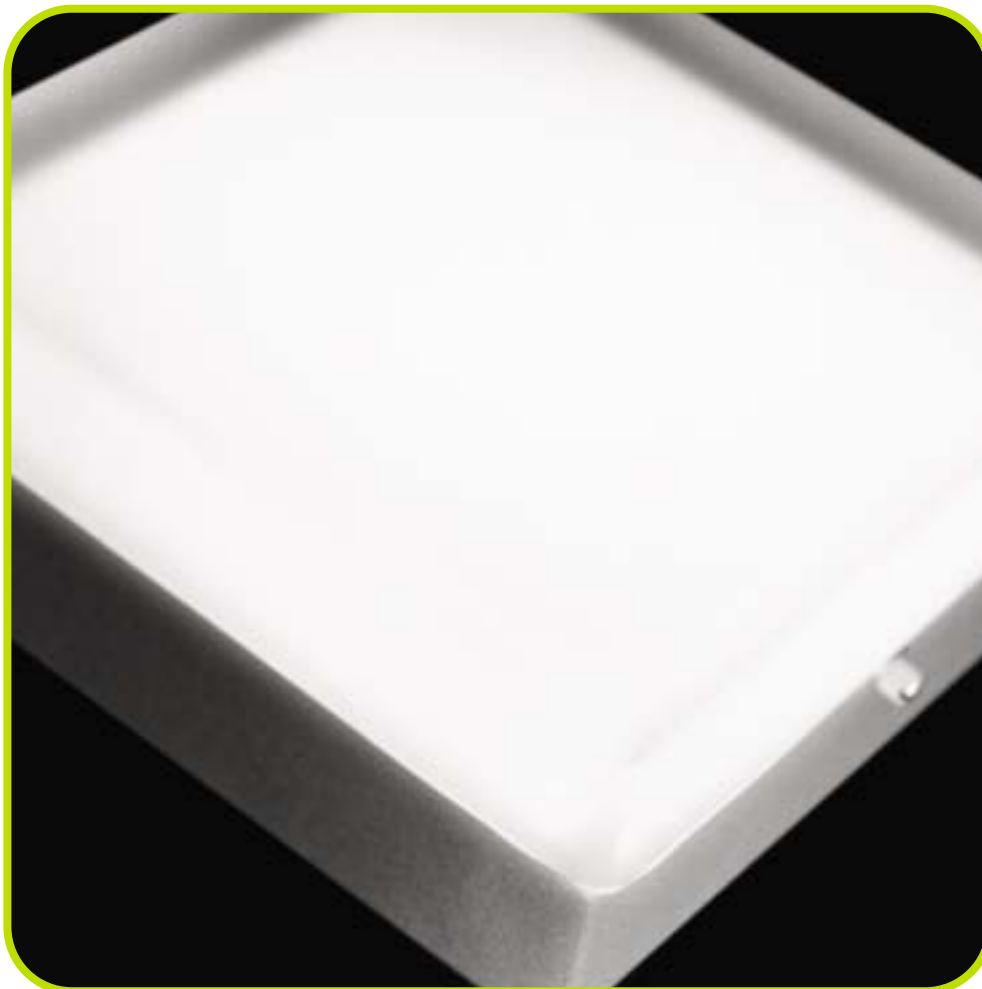

Code	Description	Qty
GSHVLIT	60W Tungsten single voltage 230V output	1
GSHVLIT2	60W Tungsten dual voltage 115/230V output	1
GSHVLITFL	11W Fluorescent single voltage 230V output	1
GSHVLITFL2	11W Fluorescent dual voltage 115/230V output	1

A stylish range of four shaver light units are designed to complement even the most modern of bathrooms, the soft lines ensure compatibility with any décor whilst limiting dust and dirt collection. Even light dissipation is achieved through the opal diffuser whilst also providing safe disconnection of lamp contacts (when removed for easy replacement of lamps – 60W variants only).

Careful attention has been paid for fast and easy installation including a removable back plate and terminal access for wiring even after the unit has been fixed to the wall. The range is fully certified to all of the relevant safety standards.

Lamps: Striplights
 Dimensions: 500mm(L) x 60mm(W) x 70mm(H)
 Features:
 • Stylish modern design blends with any décor
 • Opal diffuser for a softer light
 • Fitted with Earth looping terminal
 • Supplied with loose back plate for faster fixing
 • 60W fittings provide safe disconnection of lamp contact once the diffuser is removed
 • Easy connection method
 • Suitable for use in bathrooms Zone 3 (see Zone information page 117)
 • Manufactured in flame retardant polycarbonate
 • IP20
 Specifications
 • Maximum lamp rating 60W
 • Supplied pre-fitted with 284mm striplight or 11W CFL fluorescent lamp
 • Manufactured in flame retardant polycarbonate
 • Compatible with UK, Europe, Australia and USA regulations
 • Complies with BS EN 60598-2-1

Light | Indoor Lighting

Bathroom range

Our range of bathroom fittings is designed to provide sophisticated light solutions while offering complete safety within this wet environment. Traditionally a difficult area to illuminate sympathetically, the G9 drum range offers stylish design options using etched glass diffusers to distribute light evenly. All luminaires are IP44 rated and comply with electrical and safety standards.

Features and benefits

40W G9 mains voltage halogen lamps (supplied with fittings)

Etched glass diffusers to distribute light evenly

Other lamp options include 25W SES candles

IP44 rated (suitable for use in bathrooms)

Round, square and flush fittings

Suitable for wall or ceiling mounting

This section features:

Decorative wall and ceiling luminaires IP44: G9 halogen and candle lamps

Shaver lights: 11W compact and 60W tungsten

Shower downlights IP54: Low voltage and GU10

Decorative bathroom wall lights

GBDWB

Code	Description	Qty
GBDWB	Wall light	1

Lamps: 40W candle SES (lamp required)
Dimensions: 265 x 155 x 89mm

This range has been designed specifically for the bathroom. The range includes square and circular options plus a series of modern wall mounted designs.

In particular the GBDGP distributes light horizontally and a pair of these mounted either side of a mirror provides a great effect.

Features:

- All options are surface mounted
- Luminaires have a variety of finishes and use etched glass diffusers to distribute light evenly
- Other lamp options include 25W and 40W SES candles
- IP44
- Suitable for use in bathrooms in zone 2 or 3

GSHVLITFL2	11W Fluorescent dual voltage 115/230V output	1

Lamps: 60W Striplights or 11W CFL fluorescent (lamps included)

Dimensions:
500mm(L) x 60mm(W) x 70mm(H)

A stylish range of four shaver light units are designed to complement even the most modern of bathrooms, the soft lines ensure compatibility with any décor whilst limiting dust and dirt collection. Even light dissipation is achieved through the opal diffuser whilst also providing safe disconnection of lamp contacts (when removed for easy replacement of lamps – 60W variants only).

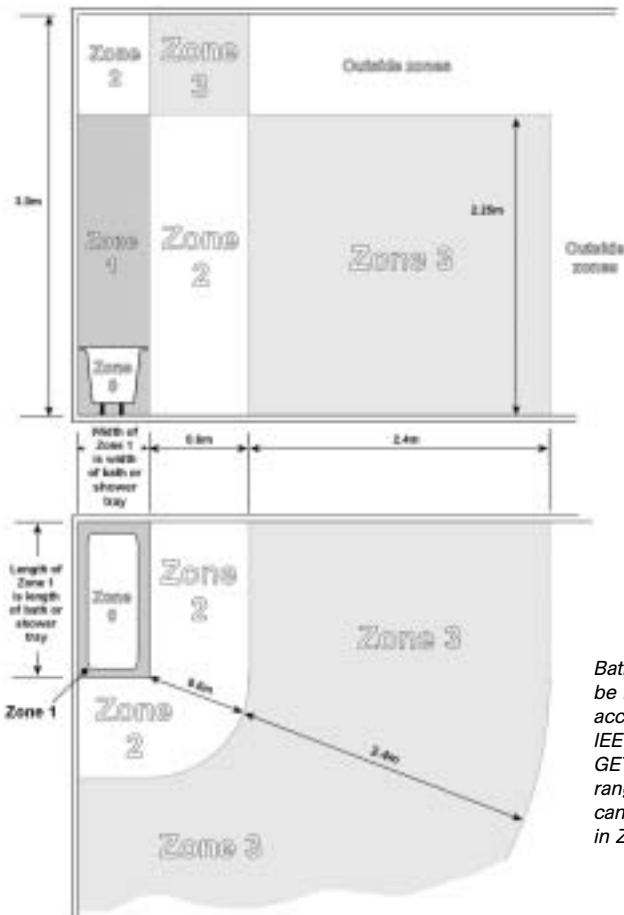

Careful attention has been paid for fast and easy installation including a removable back plate and terminal access for wiring even after the unit has been fixed to the wall. The range is fully certified to all of the relevant safety standards.

Features

- Stylish modern design blends with any décor
- Opal diffuser for a softer light
- Fitted with Earth looping terminal
- Supplied with loose back plate for faster fixing
- 60W fittings provide safe disconnection of lamp contact once the diffuser is removed
- Easy connection method
- Suitable for use in bathrooms Zone 3 (see Zone information below)
- Manufactured in flame retardant polycarbonate
- IP20

Specifications

- Maximum lamp rating 60W
- Supplied pre-fitted with 284mm striplight or 11W CFL fluorescent lamp
- Manufactured in flame retardant polycarbonate
- Compatible with UK, Europe, Australia and USA regulations
- Complies with BS EN 60598-2-1

Bathroom lights must be installed in accordance with IEE regulations, GET's shaver light range is IP20 and can be installed in Zone 3.

For lighting installed in Zone 1, all luminaires must be at least IPX4, or IPX5 if water jets are used for cleaning. Mains voltage luminaires can only be used if the circuit is protected by a Residual Current Device having a rated residual operating current not exceeding 30mA. SELV (12V ac) luminaires can be used without RCD protection. The SELV source (transformer) must be located outside Zones 0, 1 and 2, e.g. in the ceiling void.

Shaver lights have concealed / protected dual voltage shutter socket

GDLGS50BS	50W 240V GU10 satin brass	1
GDLGS50PN	50W 240V GU10 pearl nickel	1

Lamp: MR16 (50W max)
 Cut-out (mm): 72.5mm
 Ceiling Depth: 100mm
 Diameter: 83mm

Features

- Suitable for use in bathrooms and shower cubicles
- Clear glass diffuser
- Also suitable for exterior use (IP54 rated), for example on porches
- Die cast construction c/w stirrup and enclosed terminal block
- For use with max 50W MR16 dichroic lamp (not included) or mains voltage GU10 lamp (included)

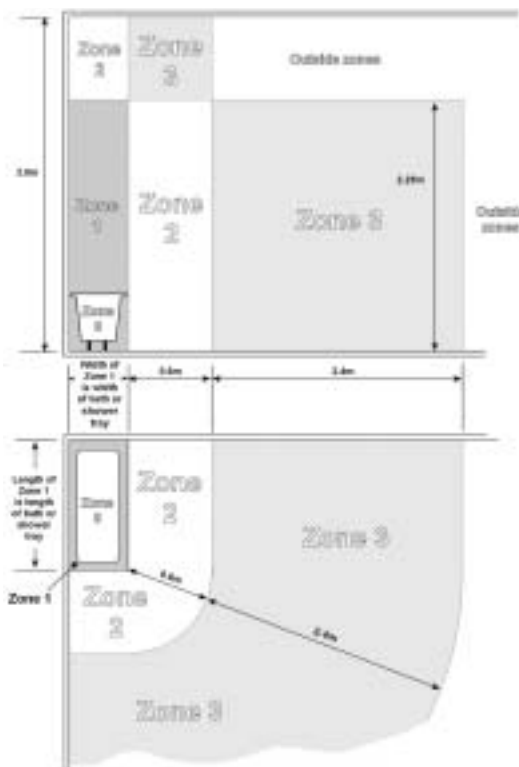

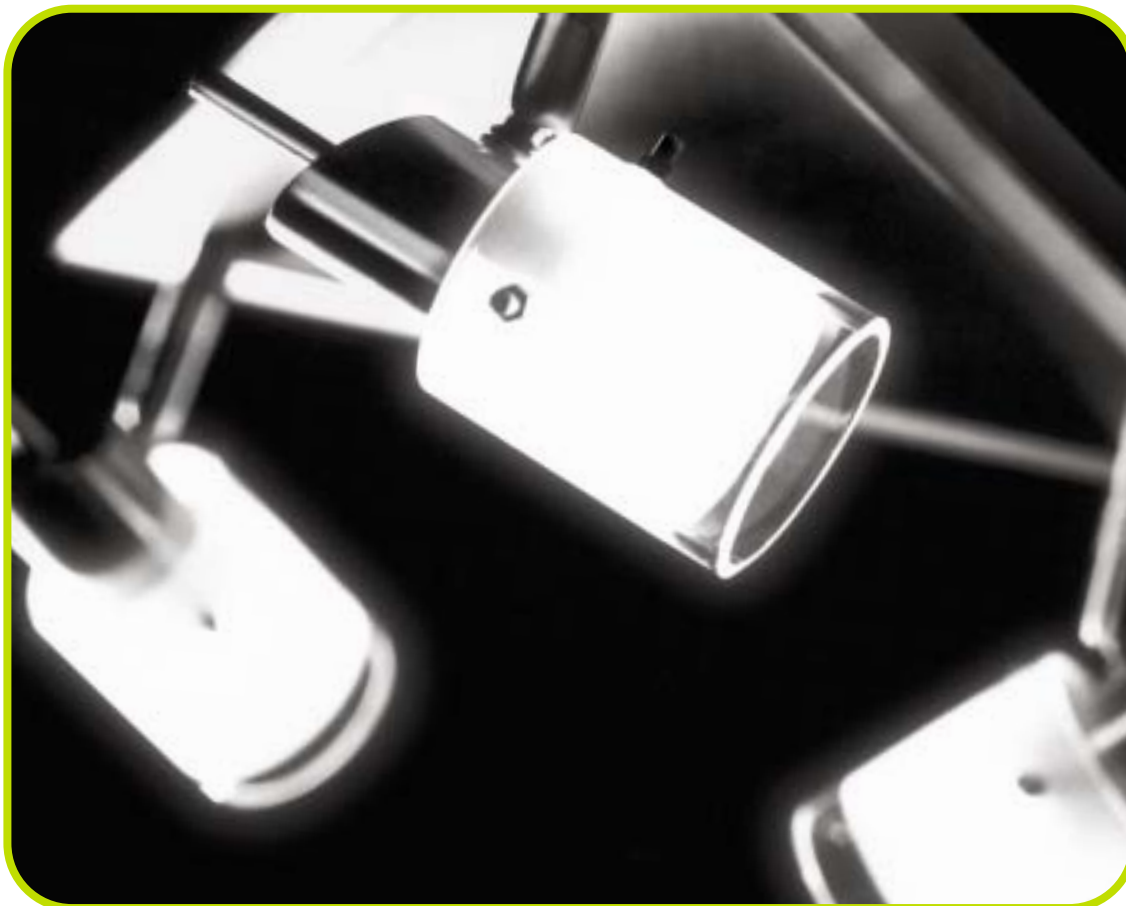

For lighting installed in Zone 1, all luminaires must be at least IPX4, or IPX5 if water jets are used for cleaning. Mains voltage luminaires can only be used if the circuit is protected by a Residual Current Device having a rated residual operating current not exceeding 30mA. SELV (12v ac) luminaires can be used without RCD protection. The SELV source (transformer) must be located outside Zones 0, 1 and 2, e.g. in the ceiling void.

Bathroom lights must be installed in accordance with IEE regulations, GET's shower range is IP54 rated and can be installed in zones 1, 2 or 3 as specified above (see page 133).

See page 160-161 for lamps.

See also page 126 for IP54 matt steel finish downlights in LED, G9 and low voltage versions.

Light | Indoor lighting | Decorative range

Our new range of spotlights use G9 and GU10 mains voltage halogen lamps in three modern, highly stylish design styles: White circo, Deco and Clear circo. The key benefit of G9 lamp technology means the light head can be smaller to enhance directional control.

The wide choice of decorative fittings – from single spotlight to triple quad ceiling plates – make these ideal for domestic and display lighting applications.

Features and benefits

Fully adjustable heads provide directional light

Wide choice of stylish fittings:

- Single spotlight
- Double bar
- Triple and quad bar and ceiling plates

Three modern styles combining glass and metal

Suitable for domestic and display lighting applications

40W G9 mains voltage halogen lamps supplied with fittings

GU10 lamps supplied with fittings

Styles

White circo: pearl nickel with white circular diffusers

Deco circo: satin nickel clear cubic diffusers

Clear circo: stainless steel with circular diffusers

GU10 flat plate spotlights

GU10 flat plate

GCSGF50BN

GCSGF50CB

Code	Description	Qty
GCSGF50B	GU10 flat plate – Brass	1
GCSGF50C	GU10 flat plate – Chrome	1
GCSGF50W	GU10 flat plate – White	1
GCSGF50BN	GU10 flat plate – Black nickel	1
GCSGF50PN	GU10 flat plate – Pearl nickel	1
GCSGF50CB	GU10 flat plate – Brushed chrome	1
GCSGF50BB	GU10 flat plate – Brushed brass	1

Lamps: GU10 50W max (lamps included)

Dimensions: 100mm diameter

Ceiling depth: 75mm

Cut-out: 80mm

A compact and robust range of mains voltage GU10 spotlights for ceiling mounting. The Flat Plate range offers an ideal retrofit for downlighters by utilising existing cut outs. In most cases this allows for a fast upgrade from low voltage to mains voltage GU10 and provides a modern sleek fitting in a variety of finishes.

Features:

- Fully adjustable heads provides directional light (60° max) and no dark ceilings
- Flat plate recesses up to the ceiling and is secured with spring clips
- Suitable for retail stores, DIY and display lighting applications
- Drop measurement 125mm

Compact fluorescent downlighters (lamp required)

Fixed glass

Floating glass

Code	Description	Qty
Fixed glass cover		
GD LCS126G	Single 26W with fixed glass	1
GD LCS226G	Twin 26W with fixed glass	1
Etched floating glass cover		
GD LCS126FG	Single 26W with floating glass	1
GD LCS226FG	Twin 26W with floating glass	1

Lamps: CFL fluorescent

Cut out: 180mm

Ceiling depth: 100mm

Dimensions: 210mm diameter

Weight: 1.5kg

A highly efficient low energy downlighter using horizontally mounted compact fluorescent lamps. Available in two options, either fixed or a floating glass. The floating glass helps to reflect a little of the light upwards to accent the ceiling and hide the lamp

Features:

- Electro brightened aluminium reflector
- Pre-wired separate control gear box with easy access for termination
- Switch start control gear (LPF)
- Horizontal lamp position
- Use with CFL fluorescent lamp – see page 163

Fitting c/w control gear

GCS9GB3PSNF	3 x G9 Spotlight glass triangle plate	1	G9	1.6kg	300 x 300 x 170mm
GCS9GB3BSNF	3 x G9 Spotlight glass rectangle plate	1	G9	1.6kg	600 x 90 x 170mm
GCS9GB4PSNF	4 x G9 Spotlight glass square plate	1	G9	1.7kg	260 x 260 x 170mm

A new range of spotlights that uses the 40W G9 mains voltage Halogen lamp in three modern design styles. The G9 lamp technology means a smaller light head can be used to provide better directional control.

Features:

- Fully adjustable heads provides directional light
- 40W G9 mains voltage halogen lamps supplied with the fitting
- Available in single spotlight, double bar, triple bar and triple and quad ceiling plates the range offers a wide choice of fittings
- Three styles of fitting are available using a mixture of glass and metal
- Suitable for both domestic use and display lighting applications

Single fittings supplied with switch

Note

If using a dimmer take the total wattage of the lights and multiply by 2. Treat this as the rated load (wattage) for the dimmer e.g. if using product with 3 x 40W lamps = 120W multiply this by 2 = 240W. The dimmer should therefore be capable of handling a load of 240W.

Fluorescent battens and diffusers

The range of fluorescent battens from GET is the ideal choice for commercial, industrial or domestic installations – combining quality, style, ease of installation and value for money.

- High impact moulded lamp holder end cap assemblies
- Powder coated steel casing for durability and enhanced rigidity
- High temperature cable for electrical safety
- High quality starter for reliability and long life
- Large terminal connectors and cable entry for ease of wiring
- Approved ballasts for long operational life and low noise emissions
- Easy fit cover tray, simply turn the twist lock at each end of the batten for fuss free installation and maintenance without the use of a tool
- High quality long life power factor correction capacitor (HPF versions)

Slimline range of battens can be mounted direct to ceiling, walls or suspended by chain or conduit

The innovative design of both the round and square diffuser kits allow for installation on existing GET battens without the need to either remove or rewire the fitting

Additional accessories include square and round prismatic diffusers and reflectors

High frequency batten options for energy efficiency

GBH60BC	60W economy with clear diffuser	1
GBH60BCPC	60W bulkhead with cover	12

Bulkheads are a tough reliable solution to provide light for safety and security. They come with a choice of GLS and Energy Saving lamp options and also have a unit with a photocell that illuminates at a preset light level.

Lamps: BC GLS or 9W CFL energy saving

Features:

- Choice of GLS or energy saving options
- IP65
- Manufactured from die-cast aluminium
- Powder coated paint finish for extra durability
- Corrosion resistant
- Tough UV stabilised polycarbonate cover
- Choice of 20mm knockouts for cable and/or conduit entry
- Suitable for use in exterior application such as walkways and paths
- Can also use energy saving lamps (see page 163)

Photocell

GPC500C

GPC500CK

Code	Description	Qty
GPC500C	Clear electronic photocell	
GPC500CK	Clear electronic photocell kit	

Photocell kit comprises photocell head, mounting bracket and fixings.

- Electromagnetic relay
- Load: 2 x 250W HPS typical
- Max capacity: 5A/60µf
- On/off levels: 70/105 Lux (1:1.5 + VE)
- IP rating: IP65

BS 5972

40W Bricklights (lamp required)

GBL40LB

Code	Description	Qty
GBL40LB	40W louvered black	1
GBL40PB	40W plain black	1

Bricklights are a great solution to recess fittings flush to the wall for added security. The louvered option is very tough and provides a degree of vandal resistance and can be used to provide good low level lighting when mounted near paths, driveways and car park entrances.

Lamps: Decorative round, candle or energy saving

Features:

- IP44 rated
- Manufactured from die-cast aluminium
- Powder coated paint finish for extra durability
- Corrosion resistant
- Suitable for lighting paths & driveways
- Suitable for use in exterior application
- Can also use energy saving lamps (see page 163)

Floodlighting and PIRs (lamp required unless stated)

GPIRTWB

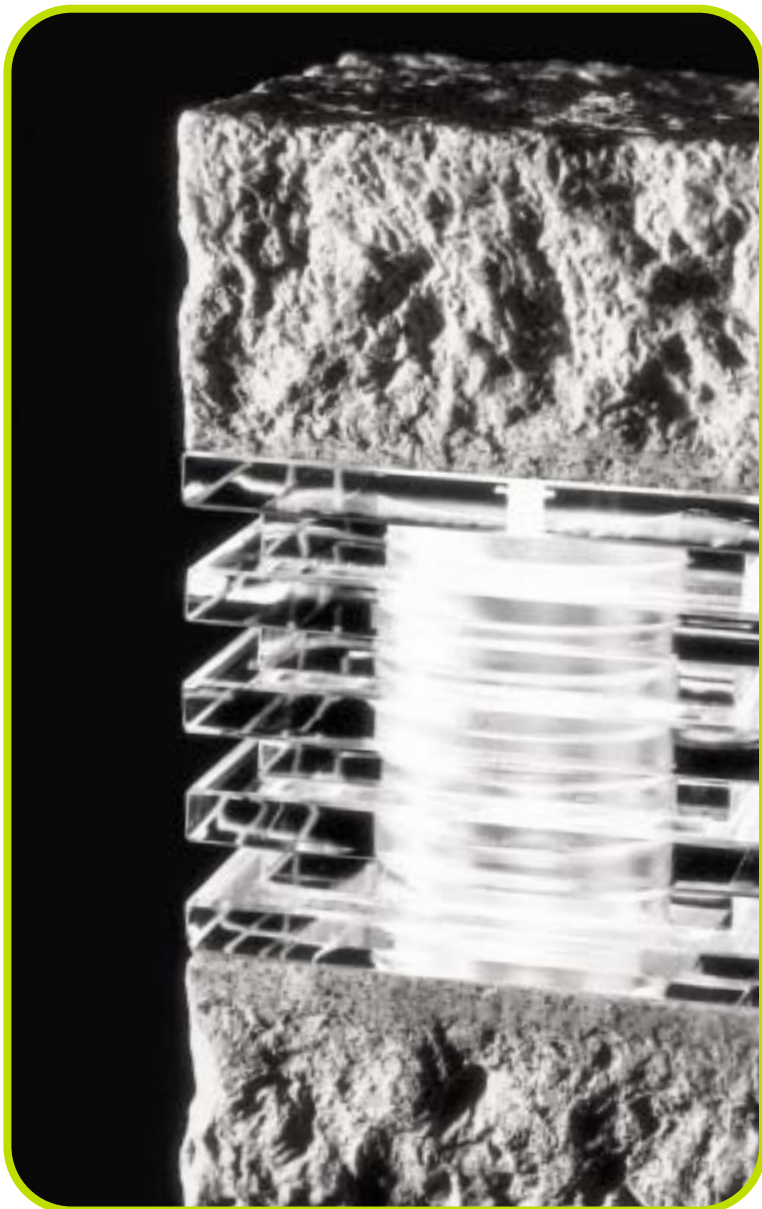

EXPIR

Code	Description	Qty
P/MINIV	150W vertical mini PIR TH floodlight c/w 150W lamp	1
GXPIRFD	500W professional 180° PIR floodlight c/w 500W lamp	1
EXPIR	500W independent PIR unit	1
MINI/FLDV	150W compact enclosed TH floodlight	1
GPIRTWB	Twin 120W PAR 38 floodlight with PIR	1

Lamps: Linear tungsten, halogen & PAR 38

- BS 4533 & BS EN 60730
- Can also use energy saving lamps (see page 163)

See page 148 for lamps.

Our range of low voltage stone effect bollards and postlights with their distinct clear white light are ideal for sign-posting walkways and drives. They not only look good but are also extremely cost effective to run.

Low voltage options extend to stainless steel postlights and pagodas to add that sophisticated touch within our ever expanding range. We guarantee that whether you want a more traditional or modern fitting there are styles and finishes to suit everyone.

Light | Outdoor lighting | Low voltage

Styles available

Stone effect bollards and postlights

Die-cast cap lights and stormglass postlights

Halo postlights and Japanese lantern pagodas

Die-cast bollards

Stainless steel pagodas and postlights:

Fitted with 0.5m of SPT-1 cable

Both single units and kits are available

Suitable for decking, drives, pathways and walls

Each fitting complete with **EZClick** connector

3 year guarantee

Light | Outdoor lighting

EZClick low voltage lighting system

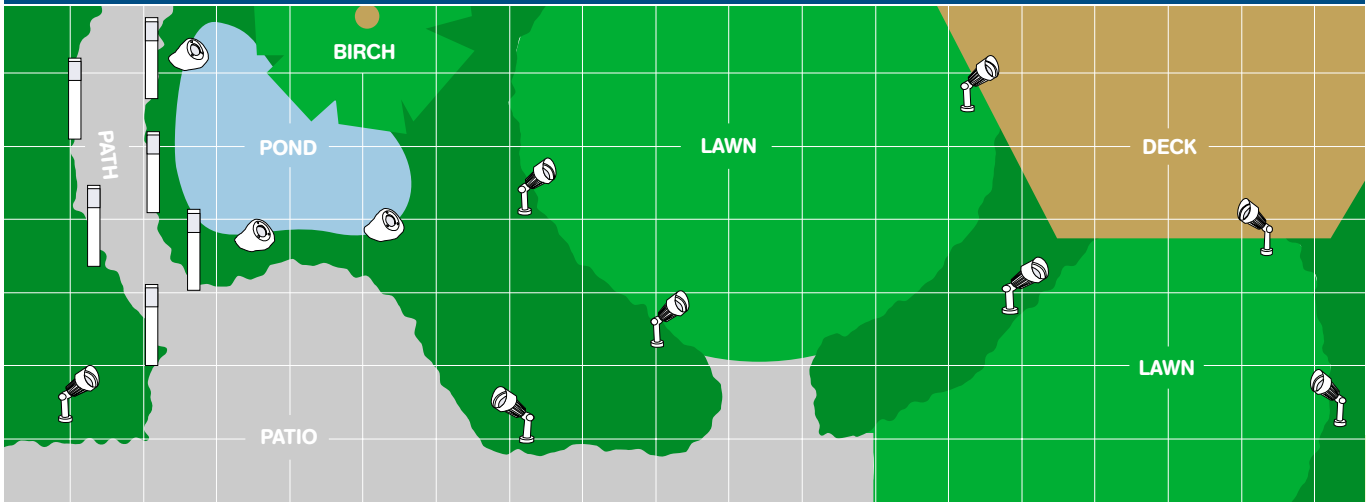

EZClick accessories

Step by step guide

The EZClick low voltage lighting system from GET is as simple as it sounds. No confusing wiring to be done at all. Simply connect the fittings to the low voltage cable with special connector blocks and plug in the transformer.

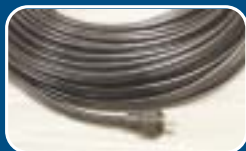

Step 1: Plan your design

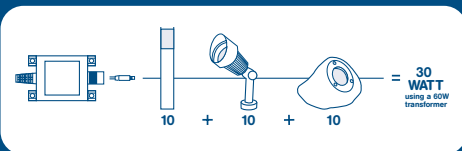

Step 2: Select your light fittings

Step 3: Select the appropriate cable length

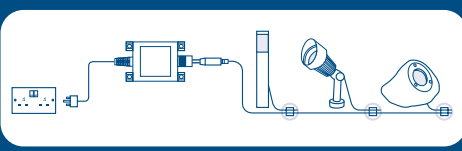

Step 4: Select an appropriate transformer by adding together the wattage of your chosen fittings

Step 5: Position fittings along the length of cable and include timer or PIR if desired

Step 6: Plug into an outdoor or indoor socket

Code	Description
GGLLPT	PIR with timer (require GGLLJ32 connectors)
GGLLT	Timer (require GGLLJ32 connectors)
Transformers	
GGLLTR60	60VA Transformer with screw connector
GGLLTR105	105VA Transformer with screw connector
Cable	
GGLLC15M	15 metre SPT-1 cable
GGLLC315M	15 metres x SPT-3 cable with screw connector
GGLLC325M	25 metres x SPT-3 cable with screw connector
Lamps & accessories	
GGLLL10W	2 x 10W spare wedge lamps
GGLLL10MR11	2 x 10W MR11 lamps
EZClick connectors	
GGLLJ31	2 x garden light 3-1 connectors
GGLLJ32	2 x garden light 3-2 connectors (for use with GGLLPT & GGLLT)
GGLLJ11	2 x garden light 1-1 connectors

- Timer has 3 settings, dusk to dawn, 3 hour or PIR to provide a wide choice of possible selections

Dimensions:
102 (L) x 63 (W) x 75mm (D) 60VA
120 (L) x 80 (W) x 75mm (D) 105VA

15m cable to extend GGLLMC315M (or GGLC325M), requires 1 x GGLLJ31 connector

- Connectors use a numbering system that applies to the diameter of the SPT cable. ie a GGLLJ31 is a 3-1 connector will connect one piece of SPT3 cable to SPT1 cable

- Fully weatherproof

- IP44

Light | Outdoor lighting | LED Decklights, pebbles & sticks

LED decklight kit – 4 twin LED light units

Code	Description	Qty
GGLLEDK4W	LED decklight kit with stainless steel finish and 4 twin LED light units, 10m cable, low voltage transformer, connectors and a 25mm drill bit	1

Lamp Colour: White

Features

- LED Life of up to 100,000 hours (non replaceable)
- Operate cool - safe to touch when operating (safe for children/pets)
- Fully compatible with GET low voltage cable and transformers to add into an existing system
- Includes 12V 10VA transformer
- Up to 20 LEDs can be run on the transformer supplied
- Illuminate step edges for added safety
- Decorate your decking/flooring
- LED's are less damaging to the environment than incandescent lamps as they use up to 90% less energy

Add-on units – for use with GET LED decklight kit

Code	Description	Qty
GGLLED1W	LED decklight add-on	1
GGLLED1G	LED decklight add-on	1
GGLLED1A	LED decklight add-on	1
GGLLED1B	LED decklight add-on	1
GGLLED1R	LED decklight add-on	1

Lamp colour : White

Lamp colour : Green

Lamp colour : Amber

Lamp colour : Blue

Lamp colour : Red

Features

- Each LED uses 0.3W of power so up to 20 can be used instead of one 10W lamp in a typical low voltage installation

As used on the LED decklights

EZClick connector

White LED Pebble Kit

Code	Description	Qty
GGLLEDK10P	10 white pebble kit	1

- 12V low voltage fitting
- 10 White LED pebbles (permanently fixed to cable)
- 15m cable, pebbles spaced 0.5m apart over the last 5m
- Indoor plug in transformer included
- Suitable for indoor or outdoor use

LED Acrylic Sticks

Code	Description	Qty
GGLLEDKT	single LED acrylic stick on metal tube	1
GGLLEDK4T	LED Acrylic 4 stick kit	1

each light contains 2 bright white LED's fitted with 0.5m of SPT-1 cable approx and EZClick connector

Overall height 320mm (200mm of acrylic & 120mm of metal tube)

kit includes:

- 4 acrylic sticks, 15m SPT-1 Cable and an indoor transformer each light fitted with 0.5m of SPT-1 cable approx and EZClick connector
- Up to an additional 20 acrylic stick lights can be added to this system

Pagoda & spotlight kits

Spotlight kit

GGLLK4S

Code	Description	Qty
GGLLK4P	4 pagoda kit	1
GGLLK4S	4 spot kit	1

Pagoda kit

GGLLK4P

Pagoda and spotlight kit features:

- Kit of four fittings supplied c/w transformer and 15m SPT-2 cable
- 3 year guarantee

GGLLPS10	Stainless steel postlight plain	1

GGLLPRS10

Lamps: 10W wedge

Features:

- Low voltage fitting
- Suitable for decking, pathways and walls
- Lamp type: 10W Wedge lamp (postlight) and 10W JC (pagoda)
- Fitted with 0.5m of SPT - 1 cable approx and **EZClick** connector
- 3 year guarantee
- Diecast spike for use in borders, lawns and gravel drives etc.

Tall postlights

GGLMLP20

Code	Description	Qty
GGLMLP20	3 head tall postlight modern style in antique bronze finish	1

Lamps: G4 20W

Dimensions: 2005 (H) x 605mm (W)

- Includes 20W G4 lamps and a 60VA transformer located in the base of the fitting
- Easy installation (12V) requires no steel armoured cable
- Can be connected into system using **EZClick** connectors

For weights and dimensions please see technical section page 192

Light | Lamps range

Range overview

Incandescent (Pages 159-160)

- Universal lamp satisfying diverse lighting requirements.
- Easily dimmable
- Flexible and versatile with no need for electronic starting and control systems
- Pearl, clear and soft white
- Bayonet and screw caps

Halogen (Pages 161-162)

- Compact crisp white uniform light output
- Dimmable
- Uses energy more efficiently
- Longer life
- Small filaments give better beam control for directional light
- Mains and low voltage

Compact fluorescent (Page 163)

- Low energy consumption and maintenance
- Perfect choice for use in slim luminaires
- Suitable for up-lighting and down-lighting
- Colour temperatures – warm white 2700K and white 3500K

Striplights (Page 162)

- Double ended tubular lamp
- Suitable for use with shaver light units
- Opal or clear

Energy saving (Page 163)

- Low energy consumption and maintenance
- Retrofit designs to replace incandescent lamps
- Wide range of wattages and sizes
- Incandescent equivalent wattage listed

T4 & T5 Miniature fluorescent (Page 164)

- High energy efficiency
- Colour temperatures – cool white 3300K and white 3000K
- Wide range of wattages and lengths
