

Temporary Traffic Calming Cable Protectors

TWO PROBLEMS, ONE SOLUTION...

These giant profiles are effectively two-products-in-one, temporary traffic calmers controlling traffic speed where necessary and a large cable protector capable of securing heavy power cables.

This is currently our largest and most rugged product group with a choice of 4 sections ranging from a 20mm hole size through to 60mm.

Although immensely strong, these profiles are also flexible which means they will fit snugly into the roadway camber with the capability of withstanding impact from heavy vehicles

To ensure drivers have early warning that they are approaching a hazard, two large yellow stripes run along the length of each side of the profile. The stripes are easily visible from a distance indicating that an immediate reduction in speed is necessary.

Fitting is simple - cut the profile to size, slit the under side and push in the cables, no bolting or bonding is necessary so ready for use in minutes.

For added safety our flexible cable protectors are:-

- Fire tested to BS 476 part 7 class 3
- Halogen free in the event of fire
- Low smoke, non toxic fume levels
- Tested for non conductivity to BS 903 C5 500V
- UV stabilised for extended out door life
- Latex free ideal for hospitals
- Easily re usable when needed

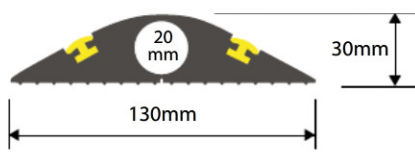

Available as follows:-

TTC/1 and TTC/2 in
4.5m lengths and
TTC/3 and TTC/4 in
1.5m lengths

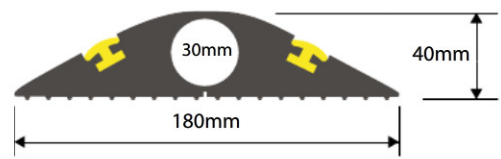

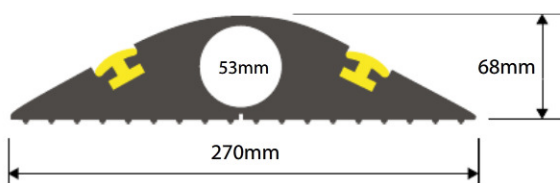

Temporary Traffic Calming Profiles

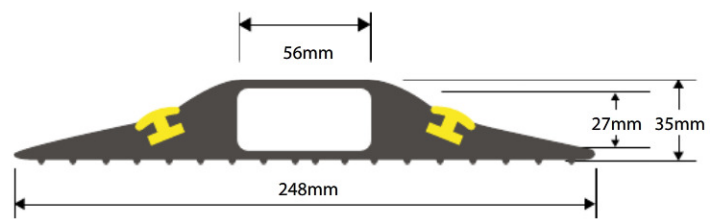

Type TTC/1
