

Part Number: FLASHPRO6

FLASHPRO6

Key Features

- Supports in-system programming
- Supports IEEE 1149 JTAG programming through STAPL
- Supports USB 2.0/3.0 available

Overview:

FlashPro6 is the newest programmer, which along with Windows, supports Linux platforms, in conjunction with LiberoSoC, FlashPro Express, and SmartDebug software. It supports all FPGA devices in PolarFire, SmartFusion2, IGLOO2 and RTG4, series.

This is completely backward-compatible and complies with the requirements specified in EMC Directive 2004/108/IEC and RoHS Directive 2011/65/EU. The minimum version requirements to run FlashPro6, on Windows and Linux, are Libero SoC, FlashPro Express and SmartDebug version 12.2 or later.
