

Serial File Transfer Cables

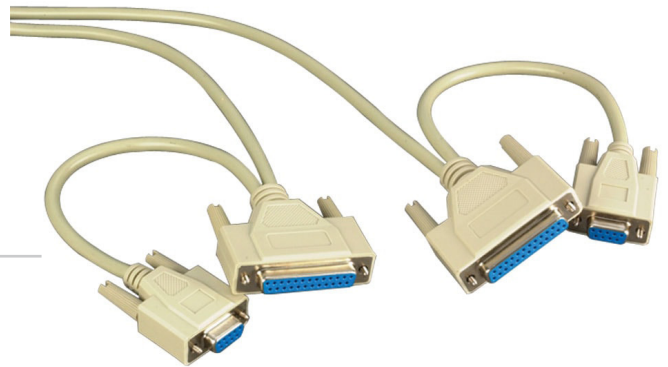

Universal RS232 File Transfer Cable

Part No: See Chart

The cables feature both the traditional 25 D type RS232 connector and the now more commonly fitted 9 D type serial connector. The all in one multi headed cable will allow for the most common traditional serial port transfer requirements.

Features & Benefits

- Multi-headed cable allows either 9 D or 25 D connection - providing complete serial port flexibility
- High quality moulded cables manufactured using foil screened cable
- Now recognised as conforming to the most standard file transfer wiring configuration
