CS15NT	15A-12mm	PE	10
CS30NT	30A-16mm	PE	10

Sigma terminals

Terminals made of self-extinguishing Polyamide-6. Black base, terminal made of MS-58 brass (DIN-17660), ring made of tempered, galvanised and bichromated steel and cap made of self-extinguishing orange polypropylene.

- Clipping proof. The connection is done through a tightening device that presses evenly all of the contact surface, avoiding frictions and strains that could damage the conductors.
 - Loosening proof. The ring that surrounds the brass body guarantees that the pressure exerted by the conductors will not open the terminal and loosen the connection.
 - Total insulation. All SIGMA "S" terminals are supplied with a cap, which avoids any accidental contacts with live parts.
- All sizes can be joined together. Nominal current: 500 V.
