Alligator Clip with Female Header (4 pack)

Stock code: 2447

Description

This is a 4 pack of wires that are pre-terminated with an alligator (crocodile) clip on one end and a female header connection on the other. Alligator clips are a staple part for any workbench and with these cables you will be able to easily incorporate those clips into a breadboard, development platform, or anything else that you would normally be able to attach a female jumper connector to.

Each Alligator Clip with female header cable has a wire length of 30cm and a female connector that easily fits onto a standard 2.54mm male connector. Each pack consists of two red cables and two black cables.

These connector wires can also be used to connect a BBC microbit to a prototyping board as an alternative to using an edge connector.

Features:

- Wires with a alligator clip on one end and a female jumper cable connector on the other.
- Enables you to connect a BBC microbit to a prototyping board as an alternative to using an edge connector.
- Fits onto a standard 2.53mm male connector pin, such as those found on our Edge connector for microbit.

Contents:

- 2 x Red alligator to female jumper connector leads.
- 2 x Black alligator to female jumper connector leads.

Dimensions:

- Length: 30cm.
