Our alcohol-based hand sanitiser

REF	Box contents	Shipping unit
01001UK	100 ml	42 bottles
01004UK	500 ml	18 bottles

## General Information

### Characteristics

- Acts very quickly and thoroughly bactericide, yeasticide and tuberculocide
- very quick and effective against all enveloped viruses BVDV / vaccinia (incl. HCV / HBV / HIV)
- thoroughly effective against the non-enveloped viruses rota, adeno, polio and noro virus (virucidal effective according to EN 14476)
- effective against MRSA
- perfume and colouring-free
- very good skin compatibility – Dermatologically tested: “very good”

### Areas of application

For hygienic and surgical hand disinfection for all areas of human hygiene with high demands on hand hygiene: Clinics, medical practices, ambulances, care facilities, industrial and laboratory areas.

Ready to use. Keep hands / forearms moist during application. See standard methods for hygienic (EN 1500) and surgical (EN 12791) hand disinfection.

### Composition

100 g contains:  
Active ingredient: 73.5 g ethanol; other constituent materials: Purified water, moisturiser / surfactants.

### Shelf life

Ethasept® can be used for up to 12 months after opening the original container for the first time. The products must only be stored in the original sealed container, contamination must be avoided while removing product, and the products must be kept and stored in accordance with standard storage conditions (protected from damp, direct sunlight, heat and frost) at a temperature of between 5 °C and 25 °C.

### Regulatory information

Ethasept® is not a medicinal product and is covered by the Biocidal Products Directive. Use biocides safely. Always read the label and product information before use. Biocide of product type 1 („human hygiene biocidal products“)
