

Easy-view storage bin

Made of sheet steel

Application:

Storage and transport of heat-treated parts in the production process, can be used as a collection container for metal parts directly from the machine

Execution:

- High capacity, service life and temperature resistance, impact-resistant
- High visibility of material stored due to front-side opening
- Parts can also be added and removed when the bins are stacked
- three-sided stacking border for longitudinal and transverse stacking of different sizes
- With label holder for identification labels
- Temperature resistance for painted bins: -10°C to +90°C, for galvanised bins: -30°C to +150°C

Art. no.	50054 334
Length	350/300 mm
Width	200 mm
Height	200 mm
Volumetric capacity	12.5 l
Colour	Silver coloured
Material	Sheet steel
Resistance against	Oil, Acid
With lid	No
Suitable for impact work	Yes
Surface	Zinc plated
Gross Weight	2.200 kg
Product Group	504
