# **T5 Electrical Testers** 1AC II Volt Alert LVD1/LVD2 Volt Light

## **Included Accessories**

T5-600 and T5-1000:

TP4 4 mm detachable probes (detachable GS38 probes for the UK) and instruction sheet

# The fast and easy solution to basic electrical testing

#### Fluke T5-600 and T5-1000 Voltage, **Continuity and Current Testers**

The Fluke T5 testers let you check voltage, continuity and current with one compact tool. Select volts, ohms or current and the instrument does the rest. Model T5-600 measures 600 volts AC/DC, model T5-1000 is designed for 1000 volts. OpenJaw $^{\text{\tiny TM}}$ current technology lets you check current up to 100 A, without breaking the circuit. The optional H5 holster keeps the test probes and leads ready to test and lets you clip the T5 onto your belt.

## **Features and Specifications**

T5-1000 1000

• 1000V 1000V 100A 1000Ω 1000V CAT III

	T5-600
Display Count	1000
Automatic Selection	•
Continuity and Bleeper	•
Sleep Mode	•
AC Voltage	600V
DC Voltage	600V
AC Current	100A
Resistance	1000Ω
Safety range	600V CAT III

Battery life: 400 hours Size (HxWxD):

203 mm x 51 mm x 30.5 mm

Weight: 0.38 kg Two year warranty

## Fluke 1AC II VoltAlert™

The Fluke VoltAlert AC voltage detector is very easy to use - just touch the tip to a terminal strip, outlet or cord. When the tip glows red and the unit beeps, you know there is voltage on the line.

- It continually tests its battery and its circuit integrity with a periodic double flash visual indication.
- Highest safety rating: CAT IV 1000V
- Detects voltage without metallic contact

Operating range: 200 - 1000V AC Batteries: Two AAA Alkaline

Size (H): 148 mm Two Year Warranty

Fluke 1AC II VoltAlert™ 5-pack

# **LVD1 Volt Light**

Dual sensitivity voltage detector

- Detects voltage from 40V to 300V AC
- Blue light means you're close
- Red light means you're at the source
- · Comes with a versatile clip to secure light to pocket, hat or even panel door

## LVD2 Volt Light

Combines bright light and voltage detection in one pen style design

- Dual sensitivity
- Detects voltage from 90V to 600V AC
- Blue light means you're close
- Red light means you're at the source
