

JBC P005**Pedal + Adapter Kit****JBC**

This foot switch makes the tool enter **Sleep** or **Hibernation Modes**, causing no thermal stress when the component is placed on the PCB. Ideal for working with tweezers.

It also enables/disables any **Excellence module** and requires, at least, one of them to function (except when used with Nano stations).

You can select the activating mode (pressed or released) and set a minimum activation time.

It also works as start/stop button with Hot Air stations, Preheaters, Fume Extractor and Auto-Feed Soldering Station.

SPECIFICATIONS

Cable length 1.9 m
