

1 Products affected

A list of all affected products can be found in Reference Documents / Attachments under chapter 7.

2 Type of change

New Configuration Code or change of Configuration Code

3 Detailed description of change

The configuration code has been modified. This change affects all the configuration codes depicted in documents by SCHURTER AG which refer to the affected products. This includes the packaging label and documents created in SAP(e.g. invoices, order papers, etc.). None of the part numbers will be altered and will remain the same as before. To secure a unique reference, SCHURTER asks the customer to refer to the part number for future correspondence. The configuration code can be used as a second reference to identify the technical properties of a product. Please check the list "Change of configuration code PG05_06_07" for a reference of the old and new configuration code with the according part number. You can find said list in the SCHURTER Partner Service on our website.

Old packaging label (without old CC)	New packaging label (with new CC)
Old packaging label (with old CC)	New packaging label (with new CC)

4 Reason of change

The modification of the configuration code is part of an internal system change and for the future approval management at SCHURTER internally. The product type name still remains the reference at external certification bodies. This change does not affect the validity of the approval certificates of the affected products.

5 Release date

The change will be rolled-out starting ww 27/2018 and lasts approx. 12 months depending on the type and variant.

Product Change Notification					PCN for PG07 (Change Config.Code)		
owner	creation date	release date	released by	change order no	rev	page	D10-025-344
