

Depth micrometer setting standard

Mitutoyo

Application:

For checking and calibrating depth micrometers.

Version:

- A 25 mm carbide-tipped gauge block is supplied and serves as a reference point.
- The gauge blocks, which are inserted in steps of 25 mm in a robust housing, allow the precise adjustment of the depth micrometer.

Art. no.	32027 194
Min./max. length measuring range	0-300 mm
Calibration Group	On demand
