

Moulded Inductors

FASTRON Moulded Inductor CCS series always provides a great alternative whenever you need a very high inductance inductor to come in a SMD package. The CCS Series has tin plated terminations and is encapsulated with high temperature resistance material suitable to work in tough environments. The inductances range from 1uH to up 33000uH.

Applications

This SMD part has been widely accepted by users that prefer to use reflow soldering for their production line instead of through-hole mounting. Some of them include medical, automotive and communication products.
