

High-feed drill solid carbide TiAlNplus HPC 3xD with internal cooling HA

For use in steel and casting materials

ATORN®

Application

Designed for use with very high feeds on stable and high-performance machines

Version

- 3-edge drill
- 4 grinding surfaces with concave main cutting edge
- 3 drill heels
- 30° spiral angle

Advantage

- Up to 50% higher productivity than double-edged drills
- Perfectly round holes combined with excellent self-centring behaviour, even on uneven surfaces
- Extremely high feed rates thanks to the special cutting geometry
- Polished chip spaces and optimised tapered core rejuvenation ensure perfect chip removal
- Minimum burr formation at hole exit thanks to the 135° tip angle
