LF PCN A0127: Notification for mold tool transfer of CF8 155.0892.xxxx series

April 24, 2017

Dear Valued Customer,

As part of our process to maintain capability and capacity on standard product lines sold to multiple customers, Littelfuse is taking the following actions for the 155.0892.xxxx CF8 fuse series:

Littelfuse will be transferring the mold tool from its current manufacturing location in Piedras Negras, Mexico to the Littelfuse plant in Matamoros, Mexico. By moving these mold tools we will secure production and protect supply of this product to our customers. This movement will have no impact on the Form, Fit or Function of the product.

We will be moving the mold tool on April 27th, 2017. This will be a running change and we will start producing parts from the new location by **June 22th, 2017**.

Impacted Materials:
