

BLACK BREADBOARD

for test setups and prototyping

Welcome to the world of electronic prototypes, where innovation and reliability meet! Our high-quality breadboard is the ideal tool for all your electronics projects.

Whether you are an experienced electronics expert or a beginner, our breadboard is designed to optimize your prototyping experience. With precise plug-in holes and universal compatibility, it allows you to connect electronic components securely and effortlessly.

This allows you to implement your ideas quickly and reliably.

MAIN FEATURES

Breadboard design	1 contact terminal with 630 contacts, 2 distribution terminals with 200 contacts
Material of the outer surface	Plastic
Color	Black
Special features	Adhesive surface on the underside

TECHNICAL SPECIFICATIONS

Power supply	3 - 5 V recommended, suitable up to max. 50 V DC
Maximum current load	1 A
Distance between the contacts	2,54 mm (0,1 Inch)
Allowed diameter of the component connections	0,3 - 0,8 mm

ADDITIONAL INFORMATION

Dimensions	165 x 54 x 10 mm
Weight	71 g
Item number	RB-Breadboard-2B
Items shipped	RB-Breadboard-2B
Customs tariff no.	8534001900
EAN	4250236825960
