

rotating lathe centre set

With exchangeable inserts in a set

Application:

For rough machining and fine turning in general turning operations.

Execution:

- Body and moving points are die-forged and hardened.

Advantage:

- Inserts in the rotating body are interchangeable.
- Precision roller bearings ensure a high level of concentricity.
- Maintenance-free owing to permanent lubrication.

Delivery:

1x RÖHM revolving centring point in wooden case.

Art. no.	22145 120
Brand	RÖHM
Manufacturer Part Number	61702
Morse taper size	MK 2
Programming size	45 mm
Max. workpiece weight	40 kg
Concentricity tolerance	0.01 mm
Diameter of housing	45 mm
Gross Weight	0.946 kg
Product Group	201
