

Measuring microscope TM-1005B

Mitutoyo

Application:

Workshop microscope suitable for measuring longitudinal dimensions and angles on small components using XY cross-table and a rotating, scaled eyepiece.

Execution:

- Cross-table 100x50 mm
- Viewing angle: true to side
- Angle measuring range: 360°
- Angle reading: 6'
- Lens: 2x working distance of 67 mm
- Total magnification: 30x
- Transmitted light: White LED with green filter
- Incident light: White LED, dimmable

Advantage:

- Extensive range of optional reticule plates for tasks such as thread testing
- Compact design with recessed carry handles, making it easy to transport and ideally suited for confined working areas

Art. no.	39962 020
Brand	MITUTOYO
Manufacturer Part Number	176-819D
Gross Weight	22.000 kg
Product Group	3MC
