

DS26C32AT/DS26C32AM Quad Differential Line Receiver

 Check for Samples: [DS26C32AM](#), [DS26C32AT](#)

FEATURES

- **CMOS Design for Low Power**
- **$\pm 0.2V$ Sensitivity over Input Common Mode Voltage Range**
- **Typical Propagation Delays: 19 ns**
- **Typical Input hysteresis: 60 mV**
- **Inputs Won't Load Line When $V_{CC} = 0V$**
- **Meets the Requirements of EIA Standard RS-422**
- **TRI-STATE Outputs for Connection to System Buses**
- **Available in Surface Mount**
- **Mil-Std-883C Compliant**

DESCRIPTION

The DS26C32A is a quad differential line receiver designed to meet the RS-422, RS-423, and Federal Standards 1020 and 1030 for balanced and unbalanced digital data transmission, while retaining the low power characteristics of CMOS.

The DS26C32A has an input sensitivity of 200 mV over the common mode input voltage range of $\pm 7V$. The DS26C32A features internal pull-up and pull-down resistors which prevent output oscillation on unused channels.

The DS26C32A provides an enable and disable function common to all four receivers. It also features TRI-STATE outputs with 6 mA source and sink capability. This product is pin compatible with the DS26LS32A and the AM26LS32.

Logic Diagram

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Connection Diagrams

For Complete Military Product Specifications, refer to the appropriate SMD or MDS.

Figure 1. PDIP Package
 See Package Number D0016A or NFG0016E
 See Package Number NAJ0020A, NFE0016A or NAD0016A

Figure 2. 20-Lead Ceramic Leadless Chip Carrier LCCC Package

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

Absolute Maximum Ratings⁽¹⁾⁽²⁾⁽³⁾

Supply Voltage (V_{CC})	7V
Common Mode Range (V_{CM})	$\pm 14V$
Differential Input Voltage (V_{DIFF})	$\pm 14V$
Enable Input Voltage (V_{IN})	7V
Storage Temperature Range (T_{STG})	$-65^{\circ}C$ to $+150^{\circ}C$
Lead Temperature (Soldering 4 sec.)	$260^{\circ}C$
Maximum Power Dissipation at $25^{\circ}C$ ⁽⁴⁾	
Ceramic NFE0016A Package	2308 mW
Plastic NFG0016E Package	1645 mW
SOIC D0016A Package	1190 mW
Ceramic NAJ0020A Package	2108 mW
Ceramic NAD0016A Package	1215 mW
Maximum Current Per Output	± 25 mA
This device does not meet 2000V ESD rating. ⁽⁵⁾	

- (1) Absolute Maximum Ratings are those values beyond which the safety of the device cannot be ensured. They are not meant to imply that the device should be operated at these limits. The table of "Electrical Characteristics" provides conditions for actual device operation.
- (2) Unless otherwise specified, all voltages are referenced to ground.
- (3) If Military/Aerospace specified devices are required, please contact the TI Sales Office/Distributors for availability and specifications
- (4) Ratings apply to ambient temperature at $25^{\circ}C$. Above this temperature derate N Package 13.16 mW/ $^{\circ}C$, J Package 15.38 mW/ $^{\circ}C$, M Package 9.52 mW/ $^{\circ}C$, E Package 12.04 mW/ $^{\circ}C$, and W package 6.94 mW/ $^{\circ}C$.
- (5) ESD Rating: HBM (1.5 k Ω , 100 pF) Inputs $\geq 2000V$ All other pins $\geq 1000V$ EIAJ (0 Ω , 200 pF) $\geq 350V$

Operating Conditions

	Min	Max	Units
Supply Voltage (V_{CC})	4.50	5.50	V
Operating Temperature Range (T_A)			
DS26C32AT	-40	+85	$^{\circ}C$
DS26C32AM	-55	+125	$^{\circ}C$
Enable Input Rise or Fall Times		500	ns

DC Electrical Characteristics
 $V_{CC} = 5V \pm 10\%$ (unless otherwise specified)⁽¹⁾

Parameter	Test Conditions	Min	Typ	Max	Units	
V_{TH}	Minimum Differential Input Voltage $V_{OUT} = V_{OH}$ or V_{OL} $-7V < V_{CM} < +7V$	-200	35	+200	mV	
R_{IN}	Input Resistance $V_{IN} = -7V, +7V$ (Other Input = GND)	DS26C32AT	5.0	6.8	10	k Ω
		DS26C32AM	4.5	6.8	11	k Ω
I_{IN}	Input Current $V_{IN} = +10V,$ Other Input = GND	DS26C32AT		+1.1	+1.5	mA
		DS26C32AM		+1.1	+1.8	mA
	$V_{IN} = -10V,$ Other Input = GND	DS26C32AT		-2.0	-2.5	mA
		DS26C32AM		-2.0	-2.7	mA
V_{OH}	Minimum High Level Output Voltage $V_{CC} = \text{Min}, V_{DIFF} = +1V$	3.8	4.2		V	
	$I_{OUT} = -6.0$ mA					
V_{OL}	Maximum Low Level Output Voltage $V_{CC} = \text{Max}, V_{DIFF} = -1V$		0.2	0.3	V	
	$I_{OUT} = 6.0$ mA					
V_{IH}	Minimum Enable High Input Level Voltage	2.0			V	
V_{IL}	Maximum Enable Low Input Level Voltage			0.8	V	

- (1) Absolute Maximum Ratings are those values beyond which the safety of the device cannot be ensured. They are not meant to imply that the device should be operated at these limits. The table of "Electrical Characteristics" provides conditions for actual device operation.

DC Electrical Characteristics (continued) $V_{CC} = 5V \pm 10\%$ (unless otherwise specified)⁽¹⁾

Parameter		Test Conditions	Min	Typ	Max	Units
I_{OZ}	Maximum TRI-STATE Output Leakage Current	$V_{OUT} = V_{CC}$ or GND, $\overline{ENABLE} = V_{IL}$, $ENABLE = V_{IH}$		± 0.5	± 5.0	μA
I_I	Maximum Enable Input Current	$V_{IN} = V_{CC}$ or GND			± 1.0	μA
I_{CC}	Quiescent Power Supply Current	$V_{CC} = \text{Max}$,	DS26C32AT	16	23	mA
		$V_{DIF} = +1V$	DS26C32AM	16	25	mA
V_{HYST}	Input Hysteresis	$V_{CM} = 0V$		60		mV

AC Electrical Characteristics $V_{CC} = 5V \pm 10\%$ ⁽¹⁾

Parameter	Test Conditions	Min	Typ	Max		Units	
				DS26C32AT	DS26C32AM		
t_{PLH} , t_{PHL}	Propagation Delay Input to Output	$C_L = 50 \text{ pF}$	10	19	30	35	ns
		$V_{DIFF} = 2.5V$					
		$V_{CM} = 0V$					
t_{RISE} , t_{FALL}	Output Rise and Fall Times	$C_L = 50 \text{ pF}$		4	9	9	ns
		$V_{DIFF} = 2.5V$					
		$V_{CM} = 0V$					
t_{PLZ} , t_{PHZ}	Propagation Delay ENABLE to Output	$C_L = 50 \text{ pF}$		13	22	29	ns
		$R_L = 1000\Omega$					
		$V_{DIFF} = 2.5V$					
t_{PZL} , t_{PZH}	Propagation Delay ENABLE to Output	$C_L = 50 \text{ pF}$		13	23	29	ns
		$R_L = 1000\Omega$					
		$V_{DIFF} = 2.5V$					

(1) Unless otherwise specified, Min/Max limits apply over recommended operating conditions. All typicals are given for $V_{CC} = 5V$ and $T_A = 25^\circ C$.

Comparison Table of Switching Characteristics into “LS-Type” Load(Figure 6, Figure 7, and Figure 8) ⁽¹⁾

Parameter	Test Conditions	DS26C32A	DS26LS32A	Units	
		Typ	Typ		
t_{PLH}	Input to Output	$C_L = 15 \text{ pF}$	17	23	ns
t_{PHL}			19	23	ns
t_{LZ}	ENABLE to Output	$C_L = 5 \text{ pF}$	13	15	ns
t_{HZ}			12	20	ns
t_{ZL}	ENABLE to Output	$C_L = 15 \text{ pF}$	13	14	ns
t_{ZH}			13	15	ns

(1) This table is provided for comparison purposes only. The values in this table for the DS26C32A reflect the performance of the device, but are not tested.

TEST AND SWITCHING WAVEFORMS

Figure 3. Propagation Delay

C_L includes load and test jig capacitance.
 $S_1 = V_{CC}$ for t_{PZL} and t_{PLZ} measurements.
 $S_1 = Gnd$ for t_{PZH} and t_{PHZ} measurements.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
