

Part Number: B10443 - OptoLyzer Studio Entry (with Dongle)

OptoLyzer Studio Entry from K2L is a cost-effective yet powerful network analysis software that specifically addresses users of the APGDT001 - LIN Serial Analyzer and the APGDT002 - CAN BUS Analyzer Tool. The graphical user interface of the software eases the work with the hardware interfaces (one at a time) and comes with a great number of features that enable hassle-free analysis of CAN and LIN busses, e. g. a Trace View with live logging, message injection and filtering. The software is conveniently activated with the help of a USB license stick.
