## COVERING

Soft mould-on polyurethane, hardness 75 Shore A.

## WHEEL CENTRE BODY

Pressure die-cast aluminium.

## ROLLING ACTION

Hub with ball bearings.

Ideal solution for heavy loads and continuous moving.

## FIXED PLATE BRACKET

Yellow zinc-plated steel sheet. The bracket is designed to withstand loads up to 7000N.

It ensures capacities that make it suitable for heavy industrial applications.

## TURNING PLATE BRACKET

Yellow zinc-plated steel sheet. The bracket is designed to withstand loads up to 7000N. It ensures capacities that make it suitable for heavy industrial applications.

It consists of (see Fig.1):

1. fitting plate: yellow zinc-plated steel sheet;
2. fork: yellow zinc-plated steel sheet;
3. ball race ring: yellow zinc-plated steel sheet;
4. central pin: class 8.8 steel screw and steel nut;
5. rotation system: dual grease-lubricated ball race;
6. dust seal: RAL 7015 dark grey technopolymer.

## BRAKE

Front brake (RE.F2-100) or rear brake (RE.F2-125-160-200) dual-effect with simultaneous locking of wheel and bracket.

The brake is simple and effective to use: it is actuated and released by a simple action from the top downward at the tip of two separate pedals, thus ensuring the utmost manoeuvring comfort.

On wheels with a rear brake, the braking efficacy may be adjusted with a socket head screw M8.

## STANDARD EXECUTIONS

- **PSL-H**: fixed plate bracket, without brake.
- **SSL-H**: turning plate bracket, without brake.
- **SSF-H**: turning plate bracket, with brake.

## APPLICATIONS

Excellent rolling resistance and elasticity features, high wear and tearing resistance.

For further information see wheel technical data sheet RE.F2 (see page -).
