

Product Specification Sheet - Clax Trolley

Manufactured from injection moulded plastic and anodised aluminium frame can be collapsed quickly and easily with one hand operation.

Plastic/Aluminium folding trolley with box & tray 60kg cap is a highly functional product.

The trolleys are manufactured using injected moulded plastic to ensure the strongest possible finish and are supplied with an anodised aluminium frame for additional robustness.

The frame can be collapsed easily and quickly using just one hand, making this trolley a very useful product where space is limited.

The addition of a folding box adds to its functionality, while the upper tray of the trolley has hinges so that bulky items can be stored on the lower tray alone.

The plastic/aluminium folding trolley with box & tray 60kg cap has many potential uses, while its light weight; the trolley and box weigh a total of only 7kg, making it easy to move around.

Payload

Upper Tray – 20kg

Lower Tray – 40kg

Total = 60kg

Dimensions

Unfolded – L55cm x W102cm x H91cm

Folded (with Wheels Attached) - L55cm x W71cm x H18cm

Folded (with Wheels Detached) – L47cm x W67cm x H11cm

If storage space is particularly limited, the wheels can be unclipped and attached to the base, making the trolley even more compact.

These trolleys have been manufactured to meet the European GS Standard.
